Information Collection Request Title: Pre-Test of Instruments of Psychosocial Care for the Treatment of Adults with PTSD.

Abstract: ASPE is requesting to pretest a survey that measures quality of psychotherapy for adults with Post Traumatic Stress Disorder (PTSD) in outpatient treatment settings, defined in terms of the concordance with evidence-based strategies. Despite enormous expenditures and remarkable breakthroughs in treatment, there is a clear gap between what is known about effective treatments for individuals

diagnosed with Post Traumatic Stress Disorder (PTSD) and what clinicians actually implement in treatment settings. A quality improvement initiative that measures clinicians' use of evidence based treatment and promotes feedback to providers from the consumers' perspective may enhance the adoption of evidence based services. This could ultimately improve the quality of care and consumer health outcomes.

Need and Proposed Use of the Information: Quality measures of the treatment of PTSD in concordance with evidence-based methods do not currently exist and could be used to

reduce this gap. ASPE, in partnership with NIMH, has undertaken this project to pretest 3 surveys (a clinician, clinical supervisor, and consumer measure) of the delivery of evidence based psychotherapies to adults with PTSD. The current data collection is scheduled to occur only once, over a 6 month time period in summer 2014 through the winter of 2014 at a total of 6 behavioral health care sites.

Likely Respondents: Respondents are clinicians, clinician's supervisors and consumers.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain,

disclose or provide the information requested. This includes the time needed to review instructions, to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information, to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information, and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Clinician (demographics questionnaire)	36	1	5/60	3
Clinician Supervisor (demographics questionnaire)	6	1	5/60	1
Clinician (clinician survey)	36	3	10/60	18
Clinician Supervisor (survey)	6	18	10/60	18
Consumer	108	1	10/60	18
Site Coordinator (Checklist)	6	1	30/60	3
Site Coordinator (Sampling)	6	1	2	12
Total				73
