### Caribbean Fishery Management Council; Scoping Meetings

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of scoping meetings.

**SUMMARY:** The Caribbean Fishery Management Council (Council) is transitioning from species specific fishery management to island-specific fisheries management for the exclusive economic zones of Puerto Rico, St. Thomas/St. John and St. Croix separately. This transition is in response to the numerous requests received by the Council to consider the differences among the islands in the U.S. Caribbean. These differences include preference for certain species of fish, ways in which fish species are harvested and other cultural and socio economic factors such as market availability of importance in managing fisheries. The scoping document includes actions and alternatives for each island to make changes to the existing fishery management units by including or excluding species, establish or modify management reference points to determine the status of the stocks, and identify and describe essential fish habitat for any new species considered for federal management. These actions and alternatives are presented for each island specific fishery management plan in the scoping document that is available at the Council's Web page: [www.caribbeanfmc.com](http://www.caribbeanfmc.com).

#### Puerto Rico FMP

Action 1. Identify fishery management units (FMUs) to be included in the Puerto Rico Fishery Management Plan (FMP).

Alternative 1. No action. The Puerto Rico FMP is composed of all species within the FMUs historically managed under the Spiny Lobster FMP, Reef Fish FMP, Queen Conch FMP, and the Corals and Reef Associated Plants and Invertebrates FMP.

Alternative 2. Include in the Puerto Rico FMP species with available landings information from the Southeast Fisheries Science Center. In addition, prohibited harvest species in the current Reef Fish FMP, Queen Conch FMP, and the Corals and Reef Associated Plants and Invertebrates FMP will be included.

Alternative 3. Include in the Puerto Rico FMP only those species with annual average landings equal to or greater than a certain number of pounds (X pounds) yet to be determined. In addition, prohibited harvest species in the current Reef Fish FMP, Queen Conch FMP, and the Corals and Reef Associated Plants and Invertebrates FMP will be included.

Alternative 4. Include species in the Puerto Rico FMP that meet a predetermined set of criteria established in consultation with the Southeast Fisheries Science Center and the Caribbean Council Scientific and Statistical Committee.

Action 2. Establish management reference points for FMUs in the Puerto Rico Fishery Management Plan (FMP).

Alternative 1. No action. Retain the existing management reference points or proxies for FMUs currently managed by the Council.

Alternative 2. Revise existing management reference points or proxies for FMUs managed by the Council.

Alternative 3. Establish management reference points or proxies for new species in the Puerto Rico FMP.

Action 3. Identify/describe essential fish habitat (EFH) for new species in the Puerto Rico FMP.

Alternative 1. No Action. Do not identify essential fish habitat for new species added to the Puerto Rico FMP.

Alternative 2. Describe and identify EFH according to functional relationships between life history stages of federally managed species and U.S. Caribbean marine and estuarine habitats.

Alternative 3. Designate habitat areas of particular concern in the Puerto Rico FMPs based on confirmed spawning locations and on areas or sites identified as having particular ecological importance to managed species.

#### St.Thomas/St. John FMP

Action 1. Identify fishery management units (FMUs) to be included in the St. Thomas/St. John Fishery Management Plan (FMP).

*OMB Number:* 3041–0014.

*Type of Review:* Renewal of collection.

*Frequency of Response:* On occasion.

*Affected Public:* Manufacturers and importers of mattresses.

*Estimated Number of Respondents:* 671 establishments produce mattresses;

approximately 571 produce conventional mattresses; and approximately 100 establishments produce nonconventional mattresses.

*Estimated Time per Response:* Under 16 CFR Part 1632, 671 respondents will each spend approximately 26 hours for testing and recordkeeping annually. Under 16 CFR Part 1633, 671 respondents will spend approximately 95.6 hours for testing and recordkeeping annually. (Pooling among establishments or using a prototype qualification for longer than one year may reduce this estimate.)

*Total Estimated Annual Burden:* 80,923 annual burden hours (671 establishments × 26 hours) + (671 establishments × 94.6 hours).

**General Description of Collection:** The Commission issued flammability standards for mattresses under the Standard for the Flammability of Mattresses and Mattress Pads, 16 CFR Part 1632, and the Standard for the Flammability (Open Flame) of Mattress Sets, 16 CFR Part 1633. The regulation at 16 CFR Part 1632 prescribes requirements for testing prototype designs of mattresses and mattress pads to assess ignition resistance to smoldering cigarettes. The standard requires manufacturers to maintain records concerning the mattress or mattress pad prototype, testing results, and substitute materials. The regulation at 16 CFR Part 1633 establishes requirements to test mattress prototypes using a flaming ignition source (a pair of propane burners) that represents burning bedclothes. The standard requires manufacturers to maintain certain records to document compliance with the standard, including records concerning prototype testing, pooling, and confirmation testing, and quality assurance procedures and any associated testing for open-flame ignition sources.
