Caribbean Fishery Management Council; Scoping Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of scoping meetings.

SUMMARY: The Caribbean Fishery Management Council (Council) is transitioning from species specific fishery management to island-specific fisheries management for the exclusive economic zones of Puerto Rico, St. Thomas/St. John and St. Croix separately. This transition is in response to the numerous requests received by the Council to consider the differences among the islands in the U.S. Caribbean. These differences include preference for certain species of fish, ways in which fish species are harvested and other cultural and socio economic factors such as market availability of importance in managing fisheries. The scoping document includes actions and alternatives for each island to make changes to the existing fishery management units by including or excluding species, establish or modify management reference points to determine the status of the stocks, and identify and describe essential fish habitat for any new species considered for federal management. These actions and alternatives are presented for each island specific fishery management plan in the scoping document that is available at the Council’s Web page: www.caribbeanfmc.com.

Puerto Rico FMP

Action 1. Identify fishery management units (FMUs) to be included in the Puerto Rico Fishery Management Plan (FMP).

Alternative 1. No action. The Puerto Rico FMP is composed of all species within the FMUs historically managed under the Spiny Lobster FMP, Reef Fish FMP, Queen Conch FMP, and the Corals and Reef Associated Plants and Invertebrates FMP.

Alternative 2. Include in the Puerto Rico FMP species with available landings information from the Southeast Fisheries Science Center. In addition, prohibited harvest species in the current Reef Fish FMP, Queen Conch FMP, and the Corals and Reef Associated Plants and Invertebrates FMP will be included.
