

TABLE 1—HERRING MANAGEMENT AREA 2014 HERRING QUOTAS (MT)

| Area | 2014 | 2014 adjustment |
|---------------|--------|-----------------|
| Area 1A | 31,200 | 33,967 |
| Area 1B | 4,600 | 3,016 |
| Area 2 | 30,000 | 29,664 |
| Area 3 | 42,000 | 40,675 |

After deducting the overages and adding the carryover amount to the sub-ACLs, the total catch available to the herring fleet is reduced by 477 mt. The summary of the proposed rule incorrectly stated it was increased. The background section clearly noted, however, the overall catch may not increase as a result of carryover. The methods for determining the final 2012 catch rates and subsequent 2014 adjustments were discussed in detail in the proposed rule and are not repeated here (78 FR 70009, November 22, 2013).

Comments and Responses

NMFS received no comments on this action.

Changes From the Proposed Rule

There are no changes from the proposed rule.

Classification

The Administrator, Northeast Region, NMFS, determined that this final rule is necessary for the conservation and management of the herring fishery and that it is consistent with the MSA and other applicable law.

The National Environmental Policy Act analyses to support this action were completed in Amendment 4 (76 FR 11373, March 2, 2011) and 2013–2015 Specifications/Framework 2 (78 FR 46897, August 2, 2013).

There is good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effectiveness for this rule and establish the date of publication in the **Federal Register** as the effective date for this action because delaying the effectiveness of the rule is contrary to the public interest and impracticable. The 2014 herring fishing year began on January 1, 2014. To prevent confusion and potential overharvests, it is in the best interest of the fleet and the herring resource to have the proper sub-ACLs in place immediately. Accordingly, any delay in the rule’s effectiveness would undermine the conservation objectives of the MSA and the Herring FMP, which would be contrary to the public interest.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified

to the Chief Council for Advocacy of the Small Business Administration (SBA) at the proposed rule stage that this rule, if adopted, would not have a significant economic impact on a substantial number of small entities. No comments were received on this certification, and no other information has been received that would change the determination. As a result, a Final Regulatory Flexibility Analysis is not required, and none was prepared.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 13, 2014.

Eileen Sobeck,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

RIN 0648-AY26

Fisheries of the Northeastern United States; Atlantic Mackerel, Squid, and Butterfish Fisheries; Amendment 14; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; correction.

SUMMARY: This action corrects a mistake in the effective dates in the final rule for Amendment 14 to the Atlantic Mackerel, Squid, and Butterfish Fishery Management Plan.

DATES: Effective March 26, 2014, except for the amendments to § 648.7(b)(3)(ii)–(iii) and § 648.10 which are effective September 1, 2014.

FOR FURTHER INFORMATION CONTACT: Aja Szumylo, Fishery Policy Analyst, 978-281-9195.

SUPPLEMENTARY INFORMATION:

Background

The final rule for Amendment 14 to the Atlantic Mackerel, Squid, and

Butterfish (MSB) Fishery Management Plan was published in the **Federal Register** on February 24, 2014 (79 FR 10029). The final measures in that action included: Revising vessel reporting requirements (vessel trip reporting frequency, pre-trip and pre-landing vessel notification requirements, and requirements for vessel monitoring systems); expanding vessel requirements to maximize observer’s ability to sample catch at-sea; minimizing the discarding of unsampled catch; and a measure to allow the Council to set a cap on river herring and shad catch in the Atlantic mackerel fishery.

The final rule set the effective date for amendments to regulations at § 648.7(b)(3)(ii)–(iii) and § 648.10 as April 25, 2014. These regulations establish vessel monitoring system requirements for limited access mackerel and longfin squid/butterfish moratorium permit holders. Because of the time and costs associated with purchasing and installing a new VMS unit, NMFS intended to allow these permit holders 6 months to complete purchase units, installation, and become familiar with the new requirements. To allow time for permit holders to comply with this new requirement, this correction adjusts the effective date for these measures to September 1, 2014. This correction does not change the intent or application of the measures described in the proposed and final rule.

Classification

Because it makes only minor, non-substantive changes and does not change operating practices in the fishery, it is unnecessary under 5 U.S.C. 553(b)(B) to provide for prior public comment. Because this correction notice does not constitute a substantive rule, it is not subject to the requirement for a 30-day delay in effective date in 5 U.S.C. 553(d).

Because prior notice and opportunity for public comment are not required for this rule by 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* are inapplicable.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

Correction

In the **Federal Register** of February 24, 2014, in FR Doc. 2014–03906, on page 10030, in the first column, the effective date is corrected in the **DATES** section of this document.

Dated: March 12, 2014.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 130925836–4174–02]

RIN 0648–XD189

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Catcher/Processors Using Trawl Gear in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific cod by catcher/processors using trawl gear in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the A season allowance of the 2014 Pacific cod total allowable catch apportioned to catcher/processors using trawl gear in the Central Regulatory Area of the GOA.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), March 14, 2014, through 1200 hours, A.l.t., June 10, 2014.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance

with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679. Regulations governing sideboard protections for GOA groundfish fisheries appear at subpart B of 50 CFR part 680.

The A season allowance of the 2014 Pacific cod total allowable catch (TAC) apportioned to catcher/processors using trawl gear in the Central Regulatory Area of the GOA is 782 metric tons (mt), as established by the final 2014 and 2015 harvest specifications for groundfish of the GOA (79 FR 12890, March 6, 2014).

In accordance with § 679.20(d)(1)(i), the Administrator, Alaska Region, NMFS (Regional Administrator) has determined that the A season allowance of the 2014 Pacific cod TAC apportioned to catcher/processors using trawl gear in the Central Regulatory Area of the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 150 mt and is setting aside the remaining 632 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for Pacific cod by catcher/processors using trawl gear in the Central Regulatory Area of the GOA. After the effective date of this closure the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the directed fishing closure of Pacific cod by catcher/processors using trawl gear in the Central Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of March 13, 2014.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon

the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 14, 2014.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

RIN 0648–XD190

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod in the Aleutian Islands Subarea of the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific cod, except for the Community Development Quota program (CDQ), in the Aleutian Islands subarea of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the non-CDQ allocation of the 2014 Pacific cod total allowable catch (TAC) in the Aleutian Islands subarea of the BSAI.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), March 16, 2014, through 2400 hrs, A.l.t., December 31, 2014.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907–586–7269.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.
