SUPPLEMENTARY INFORMATION:

I. Abstract

The United States Patent and Trademark Office (USPTO) surveys international and domestic participants of the USPTO's Global Intellectual Property Academy (GIPA) training programs to obtain feedback from the participants on the effectiveness of the various services provided to them in the training programs. GIPA was established in 2006 to offer training programs on enforcement of intellectual property rights, patents, trademarks, and copyrights. The training programs offered by GIPA are designed to meet the specific needs of foreign government officials (including judges, prosecutors, police, customs officials, patent, trademark, and copyright officials, and policy makers) concerning various intellectual property topics, such as global intellectual property rights protection and enforcement and strategies to handle the protection and enforcement issues in their respective countries.

This collection contains three surveys: Pre-program, post-program, and alumni. The pre-program survey is designed to obtain the background and experience of a participant and is delivered to the participant prior to their arrival for a GIPA training program. The post-program survey is used to analyze the overall effectiveness of the program and is conducted at the conclusion of the training program. The alumni survey is used to determine the value of the GIPA training program on the future job performance of the participant. The data obtained from these participation satisfaction surveys will be used to evaluate the percentage of foreign officials trained by GIPA who have initiated or implemented a positive intellectual property change in their organization; the percentage of foreign officials trained by GIPA who increased their expertise in intellectual property; the satisfaction with the intellectual property program, and the value of the experience as it relates to future job performance. The data received from these surveys will also be used to help the USPTO meet organizational
