The complaint alleged violations of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain thermal support devices for infants, infant incubators, infant warmers, and components thereof by reason of infringement of certain claims of U.S. Patent Nos. 6,483,080 and 7,335,157. On February 14, 2014, the ALJ issued the subject ID granting the motion to terminate the investigation. The ALJ further determined that the parties filed a public version of the settlement agreement in accordance with the Commission's rules. The ALJ also determined that there is no indication that termination of this investigation based on the settlement agreement would have an adverse

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* This information collection is a census of tribal court systems that operated in Indian country during the period 2013. The Bureau of Justice Statistics (BJS) proposes to implement a National Survey of Tribal Courts (NSTCS). Tribal courts are diverse, with some being extensively elaborate in their development, some based on traditional or indigenous customs, and others are just beginning to develop a modern judicial system. Over the past decade, various legislation, including the Tribal Law and Order Act of 2010 and Violence against Women Reauthorization Act of 2013, have sought to improve public safety in Indian country through increased sentencing authority and expanded jurisdiction. Existing information on tribal courts is extremely dated or was conducted with a narrow focus and did not include the three distinctive areas of tribal courts; the lower 48 States, Alaska, and the Courts of Indian Offenses. No reliable and recurring data are collected on the volume of criminal and civil cases handle in tribal courts annually. Hence, the NSTCS will provide national level information on the administration and operation of trial and appellate courts in Indian country. The NSTCS is designed to provide BJS and other interested stakeholders with current empirical information on tribal court systems. A goal of the NSTCS is to obtain national statistics on staffing; budgets; prosecution, public defense and civil legal services; juvenile justice; domestic violence and protection orders; enhance sentencing and jurisdiction capacity; and criminal justice database access and reporting. This will help BJS generate aggregate statistics on the magnitude and types of cases handled in tribal courts, as well establish baseline measures for
