

In the Complaint, the United States alleges that Flint Hills Resources Port Arthur, LLC (“Flint Hills”) violated, at its chemical plant in Port Arthur, Texas, various provisions of the Clean Air Act, 42 U.S.C. 7401 *et seq.* relating to the operation of flares, leak detection and repair practices, and benzene waste operations activities.

Under the consent decree, Flint Hills will implement innovative pollution control technologies to reduce emissions of volatile organic compounds (“VOCs”) and hazardous air pollutants from the two main flares and one back-up flare that operate at the Port Arthur facility. Flint Hills will operate systems that will recover and recycle waste gas back into plant processes (*i.e.*, flare gas recovery) and, for waste gas that is flared, Flint Hills will operate numerous monitoring systems and comply with several operating parameters to ensure that the flares adequately combust the gases. Flint Hills also will install “low emissions” valve technology and enhance its work practices relating to detecting and repairing leaks of VOCs from valves, pumps, and other equipment at the Port Arthur facility. Finally, the proposed Consent Decree requires Flint Hills to implement measures to minimize emissions of benzene from wastewater, to perform two community projects at a cost of \$2.35 million, and to pay a civil penalty of \$350,000.
