

comparisons in future iterations. Information will be collected for calendar year 2013.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 300 respondents (tribal courts) will take part in the National Survey of Tribal Courts Systems 2013. Based on pilot testing an average of 2 hours each is needed to complete the form appropriate for the tribal system: NSTCS-13L48, NSTCS-13AK, or NSTCS-13CFR. The estimated range of burden for respondents is expected to be between 1.5 to 2.5 hours for completion. The following factors were considered when creating the burden estimate: the estimated total number of tribal courts, the ability of tribal courts to access or gather the data, and the information systems capabilities generally found within Indian country. BJS estimates that nearly all of the approximately 300 respondents will fully complete the questionnaire.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated public burden associated with this collection is 600 hours. It is estimated that respondents will take 2 hours to complete a questionnaire. The burden hours for collecting respondent data sum to 600 hours (300 respondents \times 2 hours = 600 hours).

BILLING CODE 4410-AT-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On March 20, 2014, the Department of Justice lodged a proposed consent decree with the United States District Court for the Eastern District of Texas in the lawsuit entitled *United States v. Flint Hills Resources Port Arthur, LLC*, Civil Action No. 1:14CV169.

In the Complaint, the United States alleges that Flint Hills Resources Port Arthur, LLC (“Flint Hills”) violated, at its chemical plant in Port Arthur, Texas, various provisions of the Clean Air Act, 42 U.S.C. 7401 *et seq.* relating to the operation of flares, leak detection and repair practices, and benzene waste operations activities.

Under the consent decree, Flint Hills will implement innovative pollution control technologies to reduce emissions of volatile organic compounds (“VOCs”) and hazardous air pollutants from the two main flares and one back-up flare that operate at the Port Arthur facility. Flint Hills will operate systems that will recover and recycle waste gas back into plant processes (*i.e.*, flare gas recovery) and, for waste gas that is flared, Flint Hills will operate numerous monitoring systems and comply with several operating parameters to ensure that the flares adequately combust the gases. Flint Hills also will install “low emissions” valve technology and enhance its work practices relating to detecting and repairing leaks of VOCs from valves, pumps, and other equipment at the Port Arthur facility. Finally, the proposed Consent Decree requires Flint Hills to implement measures to minimize emissions of benzene from wastewater, to perform two community projects at a cost of \$2.35 million, and to pay a civil penalty of \$350,000.

The publication of this notice opens a period of public comment on the consent decree.
