**ACTION:** Notice and request for comments.

**SUMMARY:** As part of its continuing effort to reduce paperwork burden and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s). Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information burden for small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid OMB control number.

**DATES:** Written Paperwork Reduction Act (PRA) comments should be submitted on or before May 27, 2014. *Needs and Uses:* Section 90.523 requires that non-governmental organizations that provide services which protect the safety of life or property obtain a written statement from an authorizing state or local government entity to support the nongovernmental organization's application for assignment of 700 MHz frequencies. Section 90.527 requires 700 MHz regional planning regions to submit an initial plan for use of the 700 MHz general use spectrum in the consolidated narrowband segment 769–775 MHz and 799–805 MHz. Regional planning committees may modify plans by written request, which must contain the full text of the modification and certification that the modification was successfully coordinated with adjacent regions. Regional planning promotes a fair and open process in developing allocation assignments by requiring input from eligible entities in the allocation decisions and the application technical review/approval process. Entities that seek inclusion in the plan to obtain future licenses are considered third party respondents. Section 90.1211 authorizes the fifty-five 700 MHz regional planning committees to develop and submit on a voluntary basis a plan on guidelines for coordination procedures to facilitate the shared use of 4940–4990 MHz (4.9 GHz) band, the Commission has stayed this requirement indefinitely. Applicants are granted a geographic area license for the entire fifty MHz of 4.9 GHz spectrum over a geographical area defined by the boundaries of their jurisdiction—city, county or state. Accordingly, licensees

are required to coordinate their operations in the shared band to avoid interference, a common practice when joint operations are conducted.

Commission staff will use the information to assign licenses, determine regional spectrum requirements and to develop technical standards. The information will also be used to determine whether prospective licensees operate in compliance with the Commission's rules. Without such information, the Commission could not accommodate regional requirements or provide for the efficient use of the available frequencies. This information collection includes rules to govern the operation and licensing of the 700 MHz and 4.9 GHz bands rules and regulation to ensure that licensees continue to fulfill their statutory responsibilities in accordance with the Communications Act of 1934, as amended. Such information will continue to be used to verify that applicants are legally and technically qualified to hold licenses, and to determine compliance with Commission rules.
