

Proposed Rules

Federal Register

Vol. 79, No. 62

Tuesday, April 1, 2014

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 28

[AMS-CN-13-0085]

RIN 0581-AD35

User Fees for 2014 Crop Cotton Classification Services to Growers

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Agricultural Marketing Service (AMS) is proposing to maintain user fees for cotton producers for 2014 crop cotton classification services under the Cotton Statistics and Estimates Act at the same level as in 2013. These fees are also authorized under the Cotton Standards Act of 1923. The 2013 crop user fee was \$2.20 per bale, and AMS proposes to continue the fee for the 2014 cotton crop at that same level. This proposed fee and the existing reserve are sufficient to cover the costs of providing classification services for the 2014 crop, including costs for administration and supervision.

DATES: Comments must be received on or before April 16, 2014.

ADDRESSES: Interested persons may comment on the proposed rule using the following procedures:

- *Internet:* <http://www.regulations.gov>.
- *Mail:* Comments may be submitted by mail to: Darryl Earnest, Deputy Administrator, Cotton & Tobacco Programs, AMS, USDA, 3275 Appling Road, Room 11, Memphis, TN 38133. Comments should be submitted in triplicate. All comments should reference the docket number and the date and the page of this issue of the **Federal Register**. All comments will be available for public inspection during regular business hours at Cotton & Tobacco Program, AMS, USDA, 3275 Appling Road, Memphis, TN 38133.

FOR FURTHER INFORMATION CONTACT: Darryl Earnest, Deputy Administrator,

Cotton & Tobacco Programs, AMS, USDA, 3275 Appling Road, Room 11, Memphis, TN 38133. Telephone (901) 384-3060, facsimile (901) 384-3021, or email darryl.earnest@ams.usda.gov.

SUPPLEMENTARY INFORMATION:

Executive Order 12866 and Executive Order 13563

Executive Orders 12866 and 13563 direct agencies to access all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects, distributive impacts and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This action has been designated as a “non-significant regulatory action” under § 3(f) of Executive Order 12866 and therefore has not been reviewed by the Office of Management and Budget (OMB).

Executive Order 13175

This action has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. The review reveals that this regulation would not have substantial and direct effects on Tribal governments and would not have significant Tribal implications.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. There are no administrative procedures that must be exhausted prior to any judicial challenge to the provisions of this rule.

Regulatory Flexibility Act

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601-612), AMS has considered the economic impact of this action on small entities and has determined that its implementation will not have a significant economic impact on a substantial number of small businesses.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions so that small businesses will not be disproportionately burdened. There are

an estimated 20,000 cotton growers in the U.S. who voluntarily use the AMS cotton classing services annually, and the majority of these cotton growers are small business entities under the criteria established by the Small Business Administration (13 CFR 121.201). Small business entities that are growers in the U.S. cotton industry are defined as having annual receipts less than \$750 thousand. Continuing the user fee at the 2013 crop level as stated will not significantly affect small businesses as defined in the RFA because:

(1) The fee represents a very small portion of the cost per-unit currently borne by those entities utilizing the services. (The 2013 user fee for classification services was \$2.20 per bale; the fee for the 2014 crop would be maintained at \$2.20 per bale; the 2014 crop is estimated at 13,400,000 bales);

(2) The fee for services will not affect competition in the marketplace;

(3) The use of classification services is voluntary. For the 2013 crop, approximately 12,600,000 bales were produced; and, almost all of these bales were voluntarily submitted by growers for the classification service; and

(4) Based on the average price paid to growers for cotton from the 2012 crop of 0.7477 cents per pound, 500 pound bales of cotton are worth an average of \$373.85 each. The proposed user fee for classification services, \$2.20 per bale, is a little more than one half percent of the value of an average bale of cotton.

Paperwork Reduction Act

In compliance with OMB regulations (5 CFR part 1320), which implement the Paperwork Reduction Act (PRA) (44 U.S.C. 3501), the information collection requirements contained in the provisions to be amended by this proposed rule are currently approved by OMB and assigned OMB control number 0581-0008, Cotton Classing, Testing, And Standards.

Fees for Classification Under the Cotton Statistics and Estimates Act of 1927

This proposed rule would maintain the 2013 user fee of \$2.20 per bale as the fee charged producers for the classification of the 2014 cotton crop. The 2014 user fee was set in accordance to requirements in the Cotton Statistics and Estimates Act as amended by the provisions in the 2008 Farm Bill [Food, Conservation, and Energy Act of 2008 (Sec. 14201 3a)]. Amendments based on

Section 14201 of the 2008 Farm Bill provided that: (1) the Secretary shall make available cotton classification services to producers of cotton, and provide for the collection of classification fees from participating producers or agents that voluntarily agree to collect and remit the fees on behalf of the producers; (2) classification fees collected and the proceeds from the sales of samples submitted for classification shall, to the extent practicable, be used to pay the cost of the services provided, including administrative and supervisory costs; (3) the Secretary shall announce a uniform classification fee and any applicable surcharge for classification services not later than June 1 of the year in which the fee applies; and (4) in establishing the amount of fees under this section, the Secretary shall consult with representatives of the United States cotton industry. At pages 313–314, the Joint Explanatory Statement of the committee of conference for section 14201 stated the expectation that the cotton classification fee would continue to be a basic, uniform fee per bale fee as determined necessary to maintain cost-effective cotton classification service. Further, in consulting with the cotton industry, the Secretary should demonstrate the level of fees necessary to maintain effective cotton classification services and provide the Department of Agriculture with an adequate operating reserve, while also working to limit adjustments in the year-to-year fee.

Under the provisions the Cotton Statistics and Estimates Act as amended by the section 14201 of the 2008 Farm Bill, a user fee (dollar amount per bale classed) is proposed for the 2014 cotton crop that, when combined with other sources of revenue, will result in projected revenues sufficient to reasonably cover budgeted costs—adjusted for inflation—and allow for adequate operating reserves to be maintained. Costs considered in this method include salaries, costs of equipment and supplies, and other overhead costs, such as facility costs and costs for administration and supervision. In addition to covering expected costs, the user fee is set such that projected revenues will generate an operating reserve adequate to effectively manage uncertainties related to crop size and cash-flow timing. Furthermore, the operating reserve is expected to meet minimum reserve requirements set by the Agricultural Marketing Service, which require maintenance of a reserve fund amount equal to at least four months of projected operating costs.

The user fee proposed to be charged cotton producers for cotton classification in 2014 is \$2.20 per bale, which is the same fee charged for the 2013 crop. This fee is based on the preseason projection that 13,400,000 bales will be classed by the United States Department of Agriculture during the 2014 crop year.

Accordingly, § 28.909, paragraph (b) would reflect the continuation of the cotton classification fee at \$2.20 per bale.

As provided for in the 1987 Act, a 5 cent per bale discount would continue to be applied to voluntary centralized billing and collecting agents as specified in § 28.909(c).

Growers or their designated agents receiving classification data would continue to incur no additional fees if classification data is requested only once. The fee for each additional retrieval of classification data in § 28.910 would remain at 5 cents per bale. The fee in § 28.910(b) for an owner receiving classification data from the National Database would remain at 5 cents per bale, and the minimum charge of \$5.00 for services provided per monthly billing period would remain the same. The provisions of § 28.910(c) concerning the fee for new classification memoranda issued from the National Database for the business convenience of an owner without reclassification of the cotton will remain the same at 15 cents per bale or a minimum of \$5.00 per sheet.

The fee for review classification in § 28.911 would be maintained at \$2.20 per bale.

The fee for returning samples after classification in § 28.911 would remain at 50 cents per sample.

A 15-day comment period is provided for public comments. This period is appropriate because user fees are not changing and it is anticipated that the proposed fees, if adopted, would be made effective for the 2014 cotton crop on July 1, 2014.

List of Subjects in 7 CFR Part 28

Administrative practice and procedure, Cotton, Cotton samples, Grades, Market news, Reporting and record keeping requirements, Standards, Staples, Testing, Warehouses.

For the reasons set forth in the preamble, 7 CFR part 28 is proposed to be amended to read as follows:

PART 28—[Amended]

■ 1. The authority citation for 7 CFR part 28, Subpart D, continues to read as follows:

Authority: 7 U.S.C. 471–476.

■ 2. In § 28.909, paragraph (b) is revised to read as follows:

§ 28.909 Costs.

* * * * *

(b) The cost of High Volume Instrument (HVI) cotton classification service to producers is \$2.20 per bale.

* * * * *

■ 3. In § 28.911, the last sentence of paragraph (a) is revised to read as follows:

§ 28.911 Review classification.

(a) * * * The fee for review classification is \$2.20 per bale.

* * * * *

Dated: March 18, 2014.

Rex A. Barnes,

Associate Administrator, Agricultural Marketing Service.

RIN 2120–AK17

Disclosure of Seat Dimensions to Facilitate Use of Child Safety Seats on Airplanes During Passenger-Carrying Operations

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA Modernization and Reform Act of 2012 requires the Federal Aviation Administration to initiate rulemaking to require air carriers conducting domestic, flag, and supplemental operations to make available on their Web sites information to enable passengers to determine which child safety seats can be used on aircraft in these operations. To fulfill the requirements of the Act, the FAA proposes to require air carriers to make available on their Web sites the width of the widest passenger seat in each class of service for each make, model and series of airplane used in passenger-carrying operations. If finalized as proposed, this rule would provide greater information to caregivers to help them determine whether a particular child restraint system will fit in an airplane seat. This proposal does not affect existing regulations regarding the
