SUPPLEMENTARY INFORMATION:

I. Background

The Reagan-Udall Foundation for the FDA (the Foundation) is an independent 501(c)(3) not-for-profit organization

created by Congress to advance the mission of FDA to modernize medical, veterinary, food, food ingredient, and cosmetic product development; accelerate innovation; and enhance product safety. With the ultimate goal of improving public health, the Foundation provides a unique opportunity for different sectors (FDA, patient groups, academia, other government entities, and industry) to work together in a transparent way to create exciting new research projects to advance regulatory science.

The Foundation acts as a neutral third party to establish novel, scientific collaborations. Much like any other independently developed information, FDA evaluates the scientific information from these collaborations to determine how Reagan-Udall Foundation projects can help the Agency to fulfill its mission.

The Foundation's projects include: The Innovation in Medical Evidence Development and Surveillance (IMEDS) Program, methods for using observational electronic health care data for postmarket evidence generation, including postmarket safety surveillance; the Systems Toxicology Project, an evaluation of a systems biology approach to preclinical safety testing; and the Critical Path to Tuberculosis Multidrug Regimens (CPTR) Project, looking at new ways to develop tuberculosis combination therapies. The Foundation seeks comments on these and other potential topics for future activities.

II. Agenda

The Foundation will be providing an overview of its history, project updates, as well as projected activities going forward. Find the Meeting Agenda at <http://www.ReaganUdall.org>.

Dated: March 31, 2014.
