**AGENCY:** Federal Communications Commission.

**ACTION:** Notice and request for comments.

**SUMMARY:** As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the Federal Communication Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it

displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

**DATES:** Written PRA comments should be submitted on or before June 16, 2014. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

*Total Annual Cost:* \$68,978,000.

*Privacy Act Impact Assessment:* No impact(s).

*Nature and Extent of Confidentiality:* There is no need for confidentiality with this collection of information.

*Needs and Uses:* On July 15, 2011, the Commission adopted the Second Report and Order, In the Matter of Amendment

of Parts 73 and 74 of the Commission's Rules to Establish Rules for Digital Low Power Television Translator, and Television Booster Stations and to Amend Rules for Digital Class A Television Stations, MB Docket No. 03-185, FCC 11-110 ("LPTV Digital Second Report and Order"). This document contains rules and policies for low power television stations ("LPTV") to transition from analog to digital broadcasting. Due to the Commission adopting these rules and policies to effectuate the low power digital transition, the LPTV Digital Second Report and Order imposed Paperwork Reduction Act (PRA) burdens on licensees.

Due to the Commission initiating these new services, the Commission adopted a number of rules and regulations entailing PRA burdens on licensees and manufacturers. These rules have already been approved by the Office of Management and Budget (OMB) and are as follows:

47 CFR 74.787(a)(2)(iii) provides that mutually exclusive LPTV and TV translator applicants for companion digital stations will be afforded an opportunity to submit in writing to the Commission, settlements and engineering solutions to resolve their situation.

47 CFR 74.787(a)(3) provides that mutually exclusive applicants applying for construction permits for new digital stations and for major changes to existing stations in the LPTV service will similarly be allowed to submit in writing to the Commission, settlements and engineering solutions to rectify the problem.

47 CFR 74.787(a)(4) provides that mutually exclusive displacement relief applicants filing applications for digital LPTV and TV translator stations may be resolved by submitting settlements and engineering solutions in writing to the Commission.

47 CFR 74.787(a)(5)(i) states that an application for replacement digital television translator may be filed by a full-service television station that can demonstrate that a portion of its analog service area will not be served by its full, post-transition digital facilities. The service area of the replacement translator shall be limited to only a demonstrated loss area.

47 CFR 74.787(a)(5)(i) states that an applicant for a replacement digital television translator may propose a de minimis expansion of its full-service pre-transition analog service area upon demonstrating that it is necessary to replace its post-transition analog loss area.

47 CFR 74.790(f) permits digital TV translator stations to originate emergency warnings over the air deemed necessary to protect and safeguard life and property, and to originate local public service announcements (PSAs) or messages seeking or acknowledging financial support necessary for its continued operation. These announcements or messages shall not exceed 30 seconds each, and be broadcast no more than once per hour.

47 CFR 74.790(e) requires that a digital TV translator station shall not retransmit the programs and signal of any TV broadcast or DTV broadcast station(s) without prior written consent of such station(s). A digital TV translator operator electing to multiplex signals must negotiate arrangements and obtain written consent of involved DTV station licensee(s).

47 CFR 74.790(g) requires a digital LPTV station who transmits the programming of a TV broadcast or DTV broadcast station received prior written consent of the station whose signal is being transmitted.

47 CFR 74.794 mandates that digital LPTV and TV translator stations operating on TV channels 22-24, 32-36 and 38 with a digital transmitter not specifically FCC-certificated for the channel purchase and utilize a low pass filter or equivalent device rated by its manufacturer to have an attenuation of at least 85 dB in the GPS band. The licensees must retain with their station license a description of the low pass filter or equivalent device with the manufacturer's rating or a report of measurements by a qualified individual.

47 CFR 74.796(b)(5) requires digital LPTV or TV translator station licensees that modify their existing transmitter by use of a manufacturer-provided modification kit would need to purchase the kit and must notify the Commission upon completion of the transmitter modifications. In addition, a digital LPTV or TV translator station licensees that modify their existing transmitter and do not use a manufacturer-provided modification kit, but instead perform custom modification (those not related to installation of manufacturer-supplied and FCC-certified equipment) must notify the Commission upon completion of the transmitter modifications and shall certify compliance with all applicable transmission system requirements.

47 CFR 74.796(b)(6) provides that operators who modify their existing transmitter by use of a manufacturer-provided modification kit must maintain with the station's records for a

period of not less than two years, and will make available to the Commission upon request, a description of the nature of the modifications, installation and test instructions, and other material provided by the manufacturer, the results of performance-tests and measurements on the modified transmitter, and copies of related correspondence with the Commission. In addition, digital LPTV and TV translator operators who custom modify their transmitter must maintain with the station's records for a period of not less than two years, and will make available to the Commission upon request, a description of the modifications performed and performance tests, the results of performance-tests and measurements on the modified transmitter, and copies of related correspondence with the Commission.

Protection of Analog LPTV. In situations where protection of an existing analog LPTV or translator station without a frequency offset prevents acceptance of a proposed new or modified LPTV, TV translator, or Class A station, the Commission requires that the existing non-offset station install at its expense offset equipment and notify the Commission that it has done so, or, alternatively, negotiate an interference agreement with the new station and notify the Commission of that agreement.

47 CFR 74.798 requires all stations in the low power television services to provide notice of their upcoming digital transition to their viewers.

*Revised Information Collection Requirements:* The Commission removed the information collection requirements that were contained in 47 CFR Sections 74.786(d) and (e), and the requirements related to resolving channel conflict from this collection. The requirements were "sunsetting" when operation on channels 52 to 69 went away on December 31, 2011. Therefore, since stations cannot operate on these channels, they cannot file for these channels. This means that the requirements in the rule sections mentioned above are no longer applicable or used by respondents (stations).

##### II. Introduction

This notice satisfies the Privacy Act requirement that an agency publish a system of records notice in the **Federal Register** when there is an addition or change to the agency's systems of records. Congress has recognized that application of all requirements of the Privacy Act to certain categories of records may have an undesirable and often unacceptable effect upon agencies in the conduct of necessary public business. Consequently, Congress
