SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a currently approved information collection.

An international system exists to use satellites to detect and locate ships, aircraft, and individuals in distress if they are equipped with an emergency radio beacon. Persons purchasing a digital distress beacon, operating in the frequency range of 406.000 to 406.100 MHz, must register it with NOAA. These requirements are contained in Federal Communications Commission (FCC) regulations at 47 CFR 80.1061, 47 CFR 87.199 and 47 CFR 95.1402. The data provided by registration can assist in identifying who is in distress and in suppression of false alarms.
