

consistently applying these interventions effectively against pathogens of concern. Inappropriate application of antimicrobial interventions can result in establishments not being able to reduce pathogens to acceptable levels.

FSIS considers serotype information to be useful because establishments may consider measures to control serotypes of human health concern as well as measures to control all *Salmonella*. FSIS provides serotype information to assist establishments in identifying pathogen trends that may indicate one or more specific sources of *Salmonella* that establishments can address.

Interventions may include serotype-specific interventions or controls that generally impact *Salmonella* in poultry.

Finally, FSIS encourages establishments, in considering food safety hazards that can occur before, during, and after entry into establishments, to consider pre-harvest factors that influence pathogens on incoming birds. The Compliance Guideline for Controlling *Salmonella* and *Campylobacter* in Poultry¹³ includes pre-harvest information.

FOR FURTHER INFORMATION CONTACT: Eric J. Jabs, 816-659-8408 or Eric.J.Jabs@usda.gov.

Read Applications: All applications and comments will be available for public inspection at the office above during regular business hours (7 CFR 1.27(c)).

SUPPLEMENTARY INFORMATION: In the July 22, 2013 **Federal Register** (78 FR 43850), GIPSA requested applications for designation to provide official services in the geographic areas presently serviced by Barton, Central Illinois, Central Iowa, Farwell SW., North Dakota, Northern Plains, and Plainview. Applications were due by August 21, 2013.

Barton, Central Illinois, Central Iowa, Farwell Southwest, North Dakota, Northern Plains, and Plainview were the sole applicants for designation to provide official services in these areas. As a result, GIPSA did not ask for additional comments.

GIPSA evaluated all available information regarding the designation criteria in section 79(f) of the USGSA (7 U.S.C. 79(f)) and determined that Barton, Central Iowa, North Dakota, Northern Plains, and Plainview are qualified to provide official services in the geographic area specified in the **Federal Register** on July 22, 2013. This designation action to provide official services in these specified areas is effective April 1, 2014 to March 31, 2017.

After completing an initial quality management review of Farwell SW., GIPSA determined that a follow-up review should be conducted. Accordingly, GIPSA is designating Farwell SW to provide services in this specified area for one year, effective April 1, 2014 to March 31, 2015. During this timeframe, such a review will be conducted.

GIPSA published a **Federal Register** Notice (79 FR 3172) on January 17, 2014 amending Central Illinois' designation to include the area previously designated to Decatur Grain Inspection, Inc. (Decatur), effective October 17, 2013 to March 31, 2014. In view of this, GIPSA is separately publishing an opportunity for designation in the **Federal Register** for the amended geographic area. Accordingly, GIPSA is designating Central Illinois to provide official services in that amended geographic area until a designee is selected and announced in the **Federal Register**. This period is not to exceed one year.
