environmental risk to health or risk to safety that might disproportionately affect children.

11. Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This proposed rule is not a “significant energy action” under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves establishing temporary moving safety zones on waters of the Wando River, Cooper River, Charleston Harbor, and Ashley River, in Charleston, South Carolina during the Swim Around Charleston event on Sunday, September 21, 2014. Persons and vessels are prohibited from entering, transiting through, anchoring in, or remaining within the safety zone unless authorized by the Captain of the Port Charleston or a designated representative. This proposed rule is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. A prior environmental analysis checklist and a Categorical Exclusion Determination were completed for a regulation (USCG–2013–0322) issued for a same event in 2013. The previously completed environmental analysis checklist and Categorical Exclusion Determination can be found in the docket folder for USCG–2013–0322 at www.regulations.gov. Because this proposed rule is substantially unchanged from the regulation issued when the prior determination was made and there have been no new developments relevant to that determination, we have not completed a new environmental analysis checklist and Categorical Exclusion Determination for this proposed rule. We have made a preliminary determination this proposed rule will not have any of the following: Significant cumulative impacts on the human environment; substantial controversy or substantial change to existing environmental conditions; or inconsistencies with any federal, state, or local laws or administrative determinations relating to the environment. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

II. Background

On February 20, 2014 (79 FR 9703), FMCSA published a notice of proposed rulemaking to establish the Commercial Driver’s License Drug and Alcohol Clearinghouse (Clearinghouse), a database under the Agency’s administration that would contain controlled substances (drug) and alcohol test result information for the holders of commercial driver’s licenses (CDLs). The proposed rule would require FMCSA-regulated motor carrier employers, Medical Review Officers (MROs), Substance Abuse Professionals (SAPs), and consortia/third party administrators (C/TPAs) supporting U.S. Department of Transportation (DOT) testing programs to report verified positive, adulterated, and substituted drug test results, positive alcohol test results, test refusals, negative return-to-duty test results, and information on follow-up testing. The proposed rule would also require employers to report actual knowledge of traffic citations for driving a commercial motor vehicle (CMV) while under the influence (DUI) of alcohol or drugs. The proposed rule would establish the terms of access to the database, including the conditions under which information would be submitted, accessed, maintained, updated, removed, and released to prospective employers, current employers, and other authorized entities. Finally, it would require laboratories that provide FMCSA-regulated motor carrier employers with DOT drug testing services to report, annual, summary information about their testing activities. This rule is mandated by Section 32402 of the Moving Ahead for Progress in the 21st Century Act.

On April 15, 2014, OOIDA petitioned the Agency for a 60-day extension of the comment period for the NPRM. A copy of the OOIDA petition is included in the docket file referenced at the beginning of this document.

The FMCSA acknowledges OOIDA’s concerns. After reviewing the request, FMCSA has decided to grant a 30-day extension, to May 21, 2014, to provide all interested parties additional time to submit comments on this rulemaking.

Issued on: April 17, 2014.

Associate Administrator for Policy
