Abstract: Gasoline combustion results in the formation of engine deposits that contribute to increased emissions. Detergent additives deter deposit formation. The Clean Air Act requires gasoline to contain a detergent additive. The regulations at 40 CFR 80—Subpart G specify certification requirements for manufacturers of detergent additives, recordkeeping or reporting requirements for blenders of detergents into gasoline or post-refinery component (any gasoline blending stock or any oxygenate which is blended with gasoline subsequent to the gasoline refining process), and reporting or recordkeeping requirements for manufacturers, transferors, or transferees of detergents, gasoline, or post-refinery component (PRC). These requirements ensure that (1) a detergent is effective before it is certified by EPA, (2) a certified detergent, at the minimum concentration necessary to be effective (known as the lowest additive concentration (LAC)), is blended into gasoline, and (3) only gasoline which contains a certified detergent at its LAC is delivered to the consumer. EPA maintains a list of certified gasoline detergents, which is publicly available. As of March 2014, there were 374 certified detergents and 17 detergent manufacturers.

Form Numbers: None.

Respondents/affected entities: 1,368.

Respondent's obligation to respond: mandatory.

Estimated number of respondents: 69,504 (total).

Frequency of response: On occasion.

Total estimated burden: 220,181 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$20,180,587 (per year), includes \$335,040 annualized capital or operation & maintenance costs.

Changes in Estimates: The previous clearance consisted of 220,181 hours (3.17 hours per response), labor costs of \$18,500,528, and O&M costs of \$335,040, for a total cost of \$18,835,568. There is no increase of hours in the total estimated respondent burden compared with the ICR currently approved by OMB. The respondent universe and responses also remained the same in this collection. There was an increase in cost to the industry of \$1,345,019 per

year due to updated numbers used to calculate the industry burden and to account for inflation.

Dated: April 15, 2014.

Director, Compliance Division.
