SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Fire Protection in Shipard Employment Standard specifies a number of collection of information (paperwork) requirements. In general, the Standard requires employers to develop a written fire safety plan and written statements or policies that contain information about fire watches and fire response duties and

responsibilities. The Standard also requires the employer to obtain medical exams for certain workers and to develop training programs and to train employees exposed to fire hazards. Additionally, the Standard requires employers to create and maintain records to certify that employees have been made aware of the details of the fire safety plan and that employees have been trained as required by the Standard.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements specified in the Fire Protection in Shipyard Employment Standard. The Agency is requesting an increase in burden hours from 4,635 to 6,051 (a total increase of 1,416 burden hours). The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Fire Protection in Shipyard Employment Standard (29 CFR part 1915, subpart P)

OMB Control Number: 1218-0248.

Affected Public: Business or other for-profits.

Number of Responses: 53,121.

Frequency of Responses: Quarterly; Annually.

Average Time per Response: Varies from 5 minutes (.08 hour) for an employer to post the fire safety plan or the it in an area accessible to employees to 12 hours for firms to develop a written fire safety plan.

Estimated Total Burden Hours: 6,051.

Estimated Cost (Operation and Maintenance): \$0
