

deficit that occurs in the last historic fiscal year when actual costs and repayment obligations are subtracted from actual revenues. This surplus or deficit is combined with the projected rate installment year costs to arrive at the rate installment. This existing formula rate methodology collects annual revenue to recover annual expenses, including interest, capital requirements, and deficit recovery thus ensuring the Projects' repayment within the cost recovery criteria set forth in DOE Order RA 6120.2.

The requested extension period, under Rate Order No. WAPA-164, beginning on June 8, 2014, through June 7, 2019, includes no adjustment to the Power Rate Formula. Under the existing Power Rate Formula, the forecasted revenue for the period is \$35.5 million, an increase of \$4.2 million from the prior rate period, June 8, 2009, through June 7, 2014. The increase of \$4.2 million includes over \$4 million of forecasted increase in Operation and Maintenance, ensuring repayment within the cost recovery criteria.

Order

In view of the foregoing and under the authority delegated to me, I confirm, approve, and place into effect on an interim basis an extension of the rate formula, effective June 8, 2014. The rate formula shall remain in effect on an interim basis, pending FERC's confirmation and approval of this or a substitute rate formula on a final basis, through June 7, 2019.

Dated: April 28, 2014.

Daniel B. Poneman,
Deputy Secretary of Energy.
