Proposed Directive on Groundwater Resource Management, Forest Service Manual 2560

AGENCY: Forest Service, USDA.

ACTION: Notice of proposed directive; request for comment; announcement of national informational webinars.

SUMMARY: The Forest Service proposes to amend its internal Agency directives for Watershed and Air Management to establish direction for management of groundwater resources on National Forest System (NFS) lands as an integral component of watershed management. Specifically, the proposed amendment would provide direction on the consideration of groundwater resources in agency activities, approvals, and

authorizations; encourage source water protection and water conservation; establish procedures for reviewing new proposals for groundwater withdrawals on NFS lands; require the evaluation of potential impacts from groundwater withdrawals on NFS resources; and provide for measurement and reporting for some larger groundwater withdrawals. This proposed amendment would supplement existing special uses and minerals and geology directives to address issues of groundwater resource management and would help ensure consistent and adequate analyses for evaluating potential uses of NFS lands that could affect groundwater resources. Public comment is invited and will be considered in development of the final directive. This proposed groundwater directive represents a change in the Forest Service's national policy on water management. The Forest Service wants to ensure that there is sufficient time for potentially affected parties, including States, to comment. Thus the Agency is providing an extended comment period for the proposed directive. In addition, the Forest Service will host a webinar on the proposed directive to present information and answer questions on the proposed policy and the comment process during the first half of the comment period. Additional meetings and/or webinars will be offered as needed. Specific information regarding the dates and times of the webinar will be announced by news release and at the following Web site: <http://www.fs.fed.us/geology/groundwater>. A recording of the webinar will also be posted on the Web site.

DATES: Comments must be received by August 4, 2014.

ADDRESSES: Send comments electronically by following the instructions at the Federal eRulemaking portal at <http://www.regulation.gov>. Comments may also be submitted by electronic mail to fsm2500@fs.fed.us or by mail to Groundwater Directive Comments, USDA Forest Service, Attn: Elizabeth Berger—WFWARP, 201 14th Street SW., Washington, DC, 20250. If comments are sent electronically, the public is requested not to send duplicate comments by mail. Please confine comments to issues pertinent to the proposed directive; explain the reasons for any recommended changes; and, where possible, refer to the specific wording being addressed. All comments, including names and addresses when provided, will be placed in the record and will be available for public inspection and copying. The public may inspect the

comments received on the proposed directive at the USDA Forest Service Headquarters, located in the Yates Federal Building at 201 14th Street SW., Washington, DC, on regular business days between 8:30 a.m. and 4:30 p.m. Those wishing to inspect the comments are encouraged to call ahead at (202) 205-0967 to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT:

Joseph Gurrieri, Watershed, Fish, Wildlife, Air and Rare Plants Staff and Minerals and Geology Management Staff, (303) 275-5101. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service at (800) 877-8339 between 8:00 a.m. and 8:00 p.m. on regular business days.

SUPPLEMENTARY INFORMATION:**Background and Need for the Proposed Directive**

Despite concerns regarding water availability and quality across the country for ecosystem viability and new and existing human uses, the Forest Service does not have any comprehensive direction for management of groundwater resources on NFS lands. Ongoing climate and land use changes in combination with increasing societal water uses are resulting in substantial effects on the spatial and temporal distribution of water resources, including those on NFS lands. The proposed directives better position the Forest Service to identify and manage the consequences of those changes for the groundwater resources on NFS lands.

The Forest Service manages 193 million acres of Federal lands, much of which is located in the headwaters and recharge areas of the nation's streams and aquifers. NFS lands provide sources of drinking water for people in 42 States and the Commonwealth of Puerto Rico. Thus, the Forest Service has a critical role in maintaining the integrity of the water resources associated with NFS lands and needs to take an active role, in cooperation with the States, in comprehensive management of water resources on those lands. The Washington Office Watershed, Fish, Wildlife, Air and Rare Plants and the Minerals and Geology Management staffs propose Forest Service Manual (FSM) 2560 as a key component of this effort.

The Forest Service recognizes a need to establish a consistent approach for addressing both surface and groundwater issues that appropriately protects water resources, recognizes existing water uses, and responds to the
