FOR FURTHER INFORMATION CONTACT: Mr. Eric Sorrells, Chief, Environmental Management, at (256) 450-2677 or by email at eric.sorrells@mda.mil.

SUPPLEMENTARY INFORMATION: MDA is responsible for developing, testing, and fielding an integrated, layered, Ballistic Missile Defense System (BMDS) to defend the United States, its deployed forces, allies, and friends against all ranges of enemy ballistic missiles in all phases of flight. Using complementary interceptors; land-, sea-, air-, and space-based sensors; and battle management, command and control, and communications systems, the planned BMDS is intended to engage and negate all classes and ranges of ballistic missile threats.

MDA and its predecessor organizations prepared several programmatic BMDS National Environmental Policy Act (NEPA) documents to analyze the environmental impacts of its actions. In addition, MDA has prepared or been a cooperating agency for over 70 environmental assessments (EAs) or environmental impact statements (EISs) for specific program activities. These NEPA documents cover activities including research and development, site preparation and construction, maintenance and sustainment, manufacture of test articles (prototypes), test and evaluation, fielding of missile defense systems and components, and the ultimate decommissioning and disposal or transfer of BMDS components and assets at many DoD installations, other agency sites, and industrial sites around the globe. Additionally, MDA has carefully considered over 200 records of environmental consideration (RECs)/records of categorical exclusion/Air Force Form 813s documenting the use of the respective military Service's Categorical Exclusions (CATEXs) for
