number. The ICR documentation is available at http://www.reginfo.gov. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

1. Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency’s estimate of the burden;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

**Information Collection Requirement**

OMB Control Number 1652–0050: Critical Facility Information of the Top 100 Most Critical Pipelines: The 9/11 Act specifically tasked TSA to develop and implement a plan for inspecting critical facilities of the 100 most critical pipeline systems. (See sec. 1557 of the 9/11 Act (Pub. L. 110–53 codified at 6 U.S.C. 1207)). Pipeline operators determined their critical facilities based on guidance and criteria set forth in the TSA Pipeline Security Guidelines published in April 2011.

TSA intends to continue visiting critical pipeline facilities and collecting site-specific information from pipeline operators on facility security policies, procedures, and physical security measures. This collection is voluntary, TSA will collect information obtained during the visits using a Critical Facility Security Review (CFSR) Form. The CFSR differs from a Corporate Security Review (CSR) conducted by TSA in that a CSR looks at corporate or company-wide security management plans and practices while the CFSR will look at individual pipeline facility security measures and procedures. TSA seeks OMB approval to continue utilizing the CFSR document during critical facility reviews in order to collect facility security information. Information collected from the reviews will be analyzed and used to determine strengths and weaknesses at the nation’s critical pipeline facilities, areas to target for risk reduction strategies, pipeline industry implementation of the voluntary guidelines, and the need for regulations in accordance with the 9/11 Act provisions previously cited. TSA anticipates visiting 90 critical facilities each year.

TSA is also seeking OMB approval to continue its follow up procedure with pipeline operators on their implementation of security improvements and recommendations made during facility visits. During critical facility visits, TSA documents and provides recommendations to improve the security posture of the facility. TSA intends to continue to follow up with pipeline operators via email on their status toward implementation of the recommendations made during the critical facility visits. The follow up will be conducted between approximately 12 and 24 months after the facility visit.

TSA will use the information collected to determine to what extent the pipeline industry is implementing the 2011 guidance document and security improvement recommendations made during critical facility visits. The information provided by owners or operators for each information collection is Sensitive Security Information (SSI), and it will be protected in accordance with procedures meeting the transmission, handling, and storage requirements of SSI set forth in 49 CFR parts 15 and 1320.

The annual burden for the approval of the information collection related to the Critical Facility Review Form is estimated to be 360 hours. A maximum of 90 facility reviews will be conducted each year with each review taking approximately 4 hours (90 × 4).

The annual burden for the approval of the information collection related to the follow up on the recommendations made to facility operators is estimated to be 450 hours. TSA estimates each operator will spend approximately 5 hours to submit a response to TSA regarding its implementation of security recommendations made during critical facility visits. If a maximum of 90 critical facilities are reviewed each year, and TSA follows up with each facility operator between approximately 12 and 24 months following the visit, the total annual burden is 450 (90 × 5) hours.

The estimated number of respondents will be 90 for the critical facility review form and 90 for the recommendations follow-up, for a total of 180 respondents. The total estimated burden is 810 hours annually, 360 hours for the critical facility review form, plus 450 hours for the recommendations follow-up procedure.

---

1 See OMB Control No. 1652–0056 for the PRA approval of information collection for pipeline CSRs.
Why do we conduct a 5-year review?

Under the Act (16 U.S.C. 1531 et seq.), we maintain Lists of Endangered and Threatened Wildlife and Plants (which we collectively refer to as the List) in the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for animals) and 17.12 (for plants). Section 4(c)(2)(A) of the Act requires us to review each listed species’ status at least once every 5 years. Our regulations at 50 CFR 424.21 require that we publish a notice in the Federal Register announcing those species under active review. For additional information about 5-year reviews, refer to our factsheet at http://www.fws.gov/endangered/what-we-do/recovery-overview.html.

What information do we consider in our review?

A 5-year review considers all new information available at the time of the review. For all five of these species, this will be the second 5-year review developed for each species. In conducting these reviews, we consider the best scientific and commercial data that have become available since the listing determination or most recent status review, such as:

(A) Species biology, including but not limited to population trends, distribution, abundance, demographics, and genetics;

(B) Habitat conditions, including but not limited to amount, distribution, and suitability;

(C) Conservation measures that have been implemented that benefit the species;

(D) Threat status and trends in relation to the five listing factors (as defined in section 4(a)(1) of the Act); and

(E) Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Any new information will be considered during the 5-year review and will also be useful in evaluating the ongoing recovery programs for the species.

Which species are under review?

This notice announces our active review of the species listed in the table below.

Request for Information

To ensure that a 5-year review is complete and based on the best available scientific and commercial information, we request new information from all sources. See “What Information Do We Consider in Our Review?” for specific criteria. If you submit information, please support it with documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

How do I ask questions or provide information?

If you wish to provide information for any species listed above, please submit your comments and materials to the appropriate contact in the table above. You may also direct questions to those contacts. Individuals who are hearing impaired or speech impaired may call the Federal Relay Service at 800–877–8339 for TTY assistance.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
Comments and materials received will be available for public inspection, by appointment, during normal business hours at the offices where the comments are submitted.

Completed and Active Reviews
A list of all completed and currently active 5-year reviews addressing species for which the Southwest Region of the Service has lead responsibility is available at http://www.fws.gov/southwest/es/ElectronicLibrary_Main.cfm (under Select a Document Category, select 5-Year Review).

Authority
This document is published under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.).

Dated: May 7, 2014.

David Mendias,
Acting Regional Director, Southwest Region,
U.S. Fish and Wildlife Service.

DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service
Great Swamp National Wildlife Refuge, Morris County, NJ; Draft Comprehensive Conservation Plan and Environmental Assessment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of a draft comprehensive conservation plan and environmental assessment (CCP/EA) for Great Swamp National Wildlife Refuge (NWR), located in Morris County, New Jersey, for public review and comment. The draft CCP/EA provides habitats for a diversity of wildlife species.

Background
The CCP Process
The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–668ee) (Refuge Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Refuge Administration Act.

Public Outreach
We started pre-planning for the Great Swamp NWR CCP in 2008. In July 2010, we distributed our first newsletter and press release announcing our intent to prepare a CCP for the refuge. In July and August 2010, we had a formal public scoping period. The purpose of the public scoping period was to solicit comments from the community and other interested parties on the issues and impacts that should be evaluated in the draft CCP/EA. To help solicit public comments, we held two public meetings at the refuge during the formal public scoping period. Throughout the rest of the planning process, we have conducted additional outreach by participating in community meetings, events, and other public forums, and by requesting public input on managing the refuge and its programs. We received comments on topics such as refuge maintenance, public use and access, natural resource management, endangered and threatened species, hunting and animal welfare, and regional or global environmental issues, including water quality, air quality, and climate change. We have considered and evaluated all of the comments we received and addressed them in various ways in the alternatives presented in the draft CCP/EA.
