Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: A Formative Evaluation of NOAA's Sentinel Site Program.

OMB Control Number: 0648-xxxx.

Form Number(s): NA.

Type of Request: Regular submission (request for a new information collection).

Number of Respondents: 125.

Average Hours per Response: 20 minutes.

Burden Hours: 42.

Needs and Uses: This request is for a new collection.

The NOAA Sentinel Site Program (SSP) is a cooperative program to promote resilient coastal communities and ecosystems in the face of change. A primary purpose of the program is to directly engage local, state, and federal managers as part of a Sentinel Site Cooperative (SSC) team. By doing so, managers can help ensure the types of science conducted, information gathered, and products developed are immediately used for better management. It is important to know who is actually using the products and services developed by these Cooperatives, and to what degree is capacity being built among and between coastal professionals and organizations through communications generated through the SSCs.

The purpose of this survey is to better understand the frequency and patterns of communication as a result of the efforts of the SSP. To help gather this information, NOAA will survey individuals known to have experience with the SSP and inquire on the communications and collaborations that have resulted. This survey is intended to serve as a means of formative evaluation for this effort. A formative evaluation is used to assess programs or projects early in their development or implementation to provide information about how best to revise and modify for improvement.

Affected Public: Federal government; state, local and tribal governments.

Frequency: Annually for two years.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at reginfo.gov. Follow the instructions to review Department of Commerce collections currently under review by OMB.

AGENCY: U.S. Census Bureau, Commerce.

SUPPLEMENTARY INFORMATION:

I. Abstract

The BC-170, Census Employment Inquiry, is used to collect information such as personal data and work experience from job applicants. The BC-170 is used throughout the census and intercensal periods for surveys, special censuses, decennial census pretests, and dress rehearsals. Applicants completing the form for a census related position are applying for temporary jobs in office

and field positions (clerks, enumerators, crew leaders, supervisors). In addition, as an option to the OF-612, Optional Application for Federal Employment, the BC-170A may be used when applying for temporary/permanent office and field positions (clerks, field representatives, supervisors) on a recurring survey in one of the Census Bureau's 6 Regional Offices (ROs) throughout the United States. This form is completed by job applicants at the time they are tested. Selecting officials review the information shown on the form to evaluate an applicant's eligibility for employment. During the decennial census and the associated pre-tests, the BC-170D is intended to expedite hiring and selection in situations requiring large numbers of temporary employees for assignments of a limited duration.

The use of this form is limited to only situations that involve special, one-time or recurring survey operations at one of the ROs and/or which require the establishment of a temporary office. The form has been demonstrated to meet our recruitment needs for field workers and requires significantly less burden than the Office of Personnel Management (OPM) Optional Forms that are available for use by the public when applying for Federal positions. Over the next three years, we expect to recruit approximately 61,500 applicants for census jobs (i.e., one-time censuses, special censuses and decennial pretests and dress rehearsals), which would equate to a significant reduction in the required paperwork and public burden, as compared to other federal application forms.

The bulk of the proposed changes to the form are related to standardizing the information collected across the three variations of the forms which we currently utilized and to collect additional applicant data to facilitate the processing of the application.

II. Method of Collection

We collect this information at the time of testing for temporary and permanent positions. Potential employees being tested complete a four-page to six-page paper application at the time of testing.

Legal Authority: Title 13, U.S.C. Section 23.
