Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Recordkeeping and Reporting Occupational Injuries and Illnesses information collection. The Occupational Safety and Health Act (OSHA) and regulations 29 CFR part 1904 prescribe that certain employers maintain records of job related injuries

and illnesses. The OSHA uses the information to carry out enforcement and intervention activities to secure for workers a safe and healthful work environment. The data also provide the Bureau of Labor Statistics information to report on the number and rate of occupational injuries and illnesses in the country. In addition, the data inform employers and workers on the kinds of injuries and illnesses occurring in the workplace and their related hazards. Increased employer awareness should result in the identification and voluntary correction of hazardous workplace conditions. Likewise, workers who receive information on injuries and illnesses will be more likely to follow safe work practices and report workplace hazards. This would generally raise the overall level of safety and health in the workplace. The OSHA Act authorizes this information collection. See 29 U.S.C. 657, 673.

The OSHA is currently engaged in two rulemakings that would modify 29 CFR part 1904 requirements: (1) Improve Tracking of Workplace Injuries and Illnesses (78 FR 67254) and (2) NAICS Update and reporting Revisions (76 FR 36414). A Notice of Proposed Rulemaking has been published for each, and the public comment period for each rulemaking has ended. The OSHA is currently developing a final rule for each project. As previously noted, this ICR is a request to extend PRA authorization for the injury and illness recordkeeping requirements currently in effect. This ICR does not incorporate any changes from the proposed rules. Any further changes resulting from rulemaking would be approved under the PRA by a different ICR submitted to the OMB under procedures applicable to an ICR associated with ongoing rulemaking activity. See 5 CFR 1320.11 and 1320.12.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0176.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for
