SUPPLEMENTARY INFORMATION: On August 8, 2013 (78 FR 48593), MSHA published a Request for Information on Refuge Alternatives for Underground Coal Mines. The RFI comment period was originally scheduled to close on October 7, 2013. In response to requests from the public, MSHA extended the comment period to December 6, 2013 (78 FR 58264) and again to June 2, 2014 (78 FR 73471) to allow interested parties time to review National Institute for Occupational Safety and Health (NIOSH) studies that bear on certain issues raised in the RFI.

MSHA received a request for an additional 120-day extension of the comment period to allow the public to consider NIOSH research reports on refuge alternatives. In response, MSHA is extending the comment period to October 2, 2014.

MSHA also reminds the mining community that after April 9, 2015, in accordance with 42 CFR 84.301, previously NIOSH-approved self-contained self-rescue devices (SCSRs) will no longer be manufactured and sold as NIOSH approved. MSHA encourages the mining community to submit information on how NIOSH's revised requirements for approval of closed-circuit escape respirators (CCER) under 42 CFR Part 84 would affect their responses to the In-Place Shelter and Escape Methodology sections in the RFI on refuge alternatives. This extension provides the mining community additional time to submit comments on CCERs.

Dated: May 28, 2014.

Assistant Secretary of Labor for Mine Safety and Health.
