II. Discussion

Licenses to possess and use SNM are governed by part 70 of Title 10 of the *Code of Federal Regulations* (10 CFR). On December 7, 2012 (77 FR 73060), the NRC staff outlined its plans to revise NUREG–1520, Revision 1, “Standard Review Plan for the Review of a License Application for a Fuel Cycle Facility,” dated May 2010. The NRC staff received comments in response to the December 2012 notice. In this regard, on April 11, 2013, the NRC staff held a Category 2 public meeting which included a discussion of the outlined plan to revise NUREG–1520 and the comments received from the industry. At the April meeting, the NRC staff discussed a staff requirements memorandum (SRM) dated October 9, 2012 (SRM–SECY–120091), in which the Commission directed the NRC staff to request the American Nuclear Society (ANS) to develop an integrated safety analysis (ISA) standard that would improve the quality and completeness of ISAs. The SRM also directed the NRC staff to refrain from revising NUREG–1520 on ISA topics until after the ANS standard is issued. Accordingly, the NRC staff is not proposing to make any significant changes to SRP Chapter 3, “Integrated Safety Analysis and Integrated Safety Analysis Summary,” at this time. Changes to Chapter 3 are primarily to improve readability, rather than a change in guidance. A more complete summary of the April 11, 2013, meeting is available in ADAMS under Accession No. ML13113A251.

The draft of SRP Revision 2 clarifies the existing SRP discussion in several technical areas, including nuclear criticality safety and management measures, as summarized below. Draft Chapter 5, “Nuclear Criticality Safety,” contains an expanded discussion of the double contingency principle and double contingency protection, including a description of what constitutes a loss of double contingency. Draft Chapter 11, “Management Measures,” includes a discussion of graded management measures and the selection of items relied on for safety that relate to the application of graded management measures.

The draft of SRP Revision 2 contains two new chapters: Chapter 12, “Material Control and Accounting,” regarding 10 CFR part 74 requirements; and Chapter 13, “Physical Protection,” regarding 10 CFR part 73 requirements. These new chapters are needed because they address requirements that are referenced in 10 CFR 70.22, “Contents of applications.”

The draft of SRP Revision 2 includes administrative changes throughout the SRP to ensure consistency among the SRP chapters, improve clarity of the text, reduce redundancies, and assure that statutory, regulatory, and guidance document references are accurate and up to date. The title of this SRP was revised from “Standard Review Plan for the Review of a License Application for a Fuel Cycle Facility” to “Standard Review Plan for License Applications for Fuel Cycle Facilities.”

Dated at Rockville, Maryland, this 21st day of May 2014.

For the Nuclear Regulatory Commission.

Marissa G. Bailey,

Director, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards.

B. Submitting Comments

Please include Docket ID NRC–2014–0131 in the subject line of your comment submission, in order to ensure that the NRC is able to make your comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <http://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Further Information

The NRC staff is issuing this notice to request public comments on the draft SRP Section 8.1, Revision 5 and on draft BTP 8–9. This BTP is proposed guidance for the staff’s safety review of licensing actions associated with General Design Criteria (GDC) 17, “Electric Power Systems,” in Appendix A to part 50 of Title 10 of the *Code of Federal Regulations* (10 CFR), related to

copied with open phase electrical conditions in power systems. The previous version of SRP Section 8.1 was published on February 28, 2012 (77 FR 12086), as Revision 4 (ADAMS Accession No. ML113640121). The new BTP would be added as a reference to Chapter 8 of the SRP. Specifically Table 8–1, “Acceptance Criteria and Guidelines for Electric Power Systems,” of SRP Section 8.1 will be updated to include the BTP 8–9 after resolution of any comments and final issuance of BTP 8–9. This is reflected as the only change included in draft Revision 5 of SRP Section 8.1. The NRC plans on responding to the public comments and then issuing the updated SRP Section 8.1 and BTP as final guidance. The NRC staff intends to incorporate the final approved guidance into the next revision of Chapter 8 of NUREG–0800.

The NRC intends to put these documents in ADAMS and post it on the NRC’s public Web site at <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr0800/>. The SRP is guidance for the NRC staff. The SRP is not a substitute for the NRC regulations, and compliance with the SRP is not required.

III. Backfitting and Issue Finality

The purpose of draft BTP 8–9 is to provide guidance to the NRC staff in reviewing various licensing actions related to an electric power system design vulnerability due to open phase conditions in offsite electric power systems in accordance with GDC 17 or principal design criteria specified in the updated final safety analysis report, and 10 CFR 50.36(c)(2) and (c)(3). Issuance of the BTP and draft SRP Section 8.1, if finalized, would not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) or otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. The NRC’s position is based upon the following considerations.

1. *The draft SRP positions, if finalized, would not constitute backfitting, inasmuch as the SRP is internal guidance to NRC staff.*

The SRP provides internal guidance to the NRC staff on how to review an application for NRC regulatory approval in the form of licensing. Changes in internal staff guidance are not matters for which either nuclear power plant applicants or licensees are protected under either the Backfit Rule or the issue finality provisions of 10 CFR part 52.

2. *The NRC staff has no intention to impose the draft SRP positions on holders of existing licensees or regulatory approvals either now or in*

the future (absent a voluntary request for change from the licensee or holder of a regulatory approval).

The NRC staff does not intend to impose or apply the positions described in the draft BTP 8–9 or SRP to existing licenses and regulatory approvals. Hence, the issuance of a final BTP 8–9 or SRP—even if considered guidance within the purview of the issue finality provisions in 10 CFR part 52—would not need to be evaluated as if it were a backfit or as being inconsistent with issue finality provisions. If, in the future, the NRC staff seeks to impose a position in the draft BTP 8–9 or SRP (if finalized) on holders of already issued licenses in a manner that does not provide issue finality as described in the applicable issue finality provision, then the staff must make the showing as set forth in the Backfit Rule or address the criteria for avoiding issue finality as described in the applicable issue finality provision, as applicable.

3. Backfitting and issue finality do not—with limited exceptions discussed below—protect current or future applicants.

Applicants and potential applicants are not, with certain exceptions, protected by either the Backfit Rule or any issue finality provisions under 10 CFR part 52. Neither the Backfit Rule nor the issue finality provisions under 10 CFR part 52—with certain exclusions—were intended to apply to every NRC action that substantially changes the expectations of current and future applicants.

The exceptions to the general principle are applicable whenever an applicant references a 10 CFR part 52 license (e.g., an early site permit) and/or NRC regulatory approval (e.g., a design certification rule) with specified issue finality provisions. The NRC staff does not, at this time, intend to impose the positions represented in the draft BTP 8–9 or SRP (if finalized) in a manner that is inconsistent with any issue finality provisions. If, in the future, the staff seeks to impose a position in the draft BTP 8–9 or SRP in a manner that does not provide issue finality as described in the applicable issue finality provision, then the staff must address the criteria for avoiding issue finality as described in the applicable issue finality provision.

Dated at Rockville, Maryland, this 23rd day of May 2014.

For the Nuclear Regulatory Commission.
Joseph Colaccino,
Chief, Policy Branch, Division of Advanced Reactors and Rulemaking, Office of New Reactors.
