Title of Collection: Implementation Study of the Ramp Up to Readiness Program.

OMB Control Number: 1850-0907.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: Individuals or households.

Total Estimated Number of Annual Responses: 62,711.

Total Estimated Number of Annual Burden Hours: 18,178.

Abstract: This study will examine the implementation of Ramp-Up to Readiness, a schoolwide guidance intervention aimed at increasing the college readiness of students. The intervention is at present being implemented in 34 high schools in Minnesota, and the developers intend to make the intervention available to a much larger set of Minnesota schools. No independently gathered high-quality evidence exists, however, on whether schools are able to implement this comprehensive intervention as intended or how its core components compare to the college-readiness supports in other high schools. The project for which OMB clearance is requested will attempt to gather such evidence from 22 public Minnesota high schools through the least burdensome means. The school-level implementation study will focus on assessing whether Ramp-Up school staff implement the program as intended, on identifying the extent to which the Ramp-Up program differs from the college-readiness supports offered in schools without Ramp-Up, and on the validity of a measure of personal college readiness, which the developers hypothesize is a key mechanism through which the program impacts later outcomes. The study will collect data from school staff in the following activities: Administrative data collection, focus groups in January and June, extant document collection, instructional logs, student and staff

surveys, and student personal readiness assessment. The findings produced through analysis of these data will help (1) state education agencies seeking strategies and programs to endorse as a potential means of improving students college readiness and college enrollment, (2) local education agencies that are considering the challenges of implementing Ramp-Up, (3) the developer of this intervention (the College Readiness Consortium at the University of Minnesota) and developers of other college readiness interventions who continually seek to improve their programs by using information from studies like this, and (4) a group of education stakeholders in the Midwest interested in considering whether to conduct a study of the impacts of the Ramp-Up intervention on student outcomes.
