## II. Background

The NRC is requesting comment on this draft EPFAQ. This process is intended to describe the manner in which the NRC may provide interested outside parties an opportunity to share their individual views with NRC staff regarding the appropriate response to questions raised on the interpretation or applicability of EP guidance issued or endorsed by the NRC, before the NRC issues an official response to such questions.

Dated at Rockville, Maryland, on June 3, 2014.

For the Nuclear Regulatory Commission.

### SUPPLEMENTARY INFORMATION:

#### I. Background

DC/COL-ISG-018 was issued in October 2009 to provide clarification and guidance on the application of Section 17.4, "Reliability Assurance Program," of NUREG-0800, "Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants." The staff issued DC/COL-ISG-018 to provide clear guidance for performing safety reviews of the Reliability Assurance Program (RAP). DC/COL-ISG-018 clarified the acceptance criteria and evaluation findings contained in Standard Review Plan (SRP) Section 17.4 in support of the NRC reviews of the DC and COL applications. The ISG also made changes to the roles and responsibilities of individual branches in the Office of New Reactors that review the RAP.

#### II. Discussion

The staff published a notice of solicitation for public comment on DC/COL-ISG-018 on October 30, 2009 (74 FR 56243). The staff considered comments received and then issued the final guidance on March 28, 2011 (76 FR 17159). The staff has since updated SRP Section 17.4 and issued the revised section for use and comment on June 11, 2013 (78 FR 35072). At this time the staff plans to finalize this guidance in June 2014. As anticipated in DC/

COLISG-018, this guidance has been incorporated in SRP Section 17.4 and the NRC staff is withdrawing DC/COL-ISG-018.

Dated at Rockville, Maryland, this 30th day of May 2014.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

On June 11, 2013 (78 FR 35072), the NRC published for public comment a proposed revision to SRP Section 17.4,

“Reliability Assurance Program.” Comment submissions were received on the proposed revision. The staff made changes to the proposed revision after consideration of the comments.

The staff made several administrative changes to the text in the document to facilitate flow and better clarify the guidance based on comments received. Additional changes were made to add clarity to guidance on programmatic controls, and clarify how applicants must address Combined License Action Items and Certification Requirements and Restrictions.

A summary of the comments and the staff’s disposition of the comments are available in a separate document, “Response to Public Comments on Draft Standard Review Plan (SRP),” Section

17.4, “Reliability Assurance Program” (ADAMS Accession No. ML13296A437).

**II. Backfitting and Issue Finality**

Issuance of this final SRP section does not constitute backfitting as defined in Section 50.109 of Title 10 of the *Code of Federal Regulations* (10 CFR) (the Backfit Rule) and is not otherwise inconsistent with the issue finality provisions in 10 CFR Part 52. The NRC staff’s position is based upon the following considerations:

1. *The SRP positions do not constitute backfitting, since the SRP is internal guidance directed at the NRC staff with respect to their regulatory responsibilities.*

The SRP provides guidance to the staff on how to review an application for NRC regulatory approval in the form of
