

The data collected in the Supplement will allow the SSA to do a comparative analysis of the effect of the economic downturn and make adjustments to their MINT and FEM models if substantial differences in the data are identified. The SSA cannot obtain these data from any other source.

The SSA Supplement is the first externally sponsored survey to take advantage of the opportunity to integrate with the new SIPP annual interviewing design. The value of integrating the SSA Supplement content with the longitudinal SIPP data collection is a benefit to both programs. The SSA Supplement data will be matchable to SIPP respondents and will be released as public use data. The details about the population's savings behavior and their disability status coupled with four-year longitudinal data for the population will be an important resource extending the utility of both data collections and will support stakeholders beyond the limits of the partner agencies. The power of the new SIPP program to support interagency projects like this is an important feature in the SIPP program's redesign.

*Affected Public:* Individuals or households.

*Frequency:* One time.

*Respondent's Obligation:* Voluntary.

**Legal Authority:** The SSA Supplement is authorized by Title 13, United States Code, Section 8(b) and by Section 1110 [42 U.S.C. 1310] (a)(1) of the Social Security Act.
