

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. To the contrary, the Exchange believes that the proposal will increase competition in both the listings market and in competition for market makers. The Program will promote competition in the listings market by providing issuers with a vehicle for paying the Exchange additional fees in exchange for incentivizing tighter spreads and deeper liquidity in listed securities. While the Program closely resembles the existing CLP Program, the proposed modifications are a response to the competition from other markets that either have or are developing similar programs, including Nasdaq⁶¹ and NYSE Arca Equities, Inc.⁶²

The Exchange also believes that the proposed changes will enhance competition among participants by creating incentives for market makers to compete to make better quality markets. By requiring both that market makers meet the quoting requirements and also to compete for the CLP Rebate, the quality of quotes on the Exchange will improve. This, in turn, will attract more liquidity to the Exchange and further improve the quality of trading in CLP Securities, which will also act to bolster the Exchange's listing business. As mentioned above, this proposal is in response to similar programs at or in development at other markets.
