[Docket No. FD 35756]

Hartwell Railroad Company—Construction of Connecting Track Exemption—in Elbert County, Ga.

Hartwell Railroad Company (Hartwell), a Class III railroad, has filed a verified notice of exemption under 49 CFR 1150.36 to construct approximately 1,360 feet of connecting track in Elbert County, Ga. (the Line), on land within existing railroad rights-of-way either owned by Hartwell or CSX Transportation, Inc. (CSXT). Hartwell is the proposed operator.

In 1995, Hartwell acquired approximately 48.3 miles of rail line from Norfolk Southern Railway Company (NSR) between Toccoa (milepost P 0.5) and Elberton (milepost 48.80), in Elbert, Franklin, Hart, and Stephens Counties, Ga.¹ At the time of the acquisition, Hartwell interchanged traffic with NSR at Toccoa on the west end of the Toccoa-Elberton Line. However, NSR retained about 1.9 miles of rail line between mileposts P 48.5 and P 50.4 that connected to the east end of the Toccoa-Elberton Line, which segment had been used to effect interchange with CSXT. NSR subsequently abandoned that segment.² Consequently, the abandonment severed Hartwell's close access to interchange with CSXT at Elberton, requiring Hartwell to interchange solely with NSR at Toccoa (where access to CSXT was 60 miles to the northeast and about 37 miles to the southwest).

Hartwell seeks to construct the Line to be able to re-establish an interchange between itself and CSXT at Elberton, located on CSXT's main line between Atlanta, Ga., and Greenwood, S.C. Hartwell states that the construction and operation of the Line will permit it to offer competitive alternatives to existing and future shippers on the Toccoa-Elberton Line. Hartwell adds that its customers will also benefit from the ability to use single-line service offered by CSXT to: (1) Reach points served by CSXT that NSR does not serve; and (2) eliminate the inefficiency that would otherwise involve three carriers (Hartwell, NSR, and CSXT) instead of two (Hartwell and CSXT) to reach points served solely by CSXT. Hartwell expects to handle one train per day in
