DEPARTMENT OF COMMERCE

United States Patent and Trademark Office

[Docket No. PTO–P–2014–0032]

Request for Comments on Virtual Marking

ACTION: Request for comments.

SUMMARY: The United States Patent and Trademark Office (USPTO) is seeking public comment on virtual marking, which was provided for by the Leahy-Smith America Invents Act (AIA) as an alternative to physically marking patented articles as a means to provide notice to the public that such articles are subject to patent protection.

The AIA requires that the Director of the USPTO prepare, not later than three years from the date of enactment of the AIA, a report of: The effectiveness of virtual marking as an alternative to the physical marking of articles; whether such virtual marking has limited or improved the ability of the general public to access information about patents; and any legal issues or deficiencies that arise from such virtual marking.

DATES: To be assured of consideration, written comments must be received on or before July 16, 2014.

ADDRESSES: Written comments should be sent by email to virtualmarking@uspto.gov. Comments also may be submitted by postal mail addressed to: Mail Stop OPIA, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450, ATTN: Soma Saha. Although comments may be submitted by postal mail, the USPTO prefers to receive comments via email.

Comments will be made publicly available after the comment period via the USPTO Internet Web site (address: http://www.uspto.gov). As such, information that is not desired to be made public, such as an address or telephone number, should not be included in the comments. The USPTO does not intend to respond to individual comments.

FOR FURTHER INFORMATION CONTACT:
Soma Saha or Marina Lamm at the Office of Policy and International Affairs, by telephone at (571) 272–9300, by email at virtualmarking@uspto.gov, or by postal mail addressed to: Mail Stop OPIA, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450, ATTN: Soma Saha.

SUPPLEMENTARY INFORMATION: United States patent law provides that marking a product with a patent number gives the public notice of a patent. Under 35 U.S.C. 287(a), if a patented product is not marked with the patent number by the patent owner, damages for infringement will be limited to the time period after the patent owner gives actual notice to an alleged infringer.

Section 16 of the AIA provides a new way to comply with the requirements for patent marking by allowing patentees to mark their products virtually rather than physically. Instead of printing the actual patent number on the product, businesses can display the term “patent” or “pat.” along with an accompanying URL address of a Web site where the actual patent number will be located.

Section 16 of the AIA also requires the Director of the USPTO to prepare a report for Congress analyzing:
(A) The effectiveness of “virtual marking” as an alternative to the physical marking of articles;
(B) whether such virtual marking has limited or improved the ability of the general public to access information about patents;
(C) the legal issues, if any, that arise from such virtual marking; and
(D) the deficiencies, if any, of such virtual marking.

The report is due to Congress not later than three years after the date of enactment of the AIA, which is September 16, 2014.

Interested members of the public are invited to submit written comments they deem relevant to the above-mentioned issues. The USPTO would particularly welcome observations and comments on any of the following topics:
1. Experiences with creating and maintaining adequate and effective virtual marking Web sites;
2. effectiveness of virtual marking, including experiences using virtual marking Web sites to locate relevant patent information;
3. challenges presented by virtual marking in providing sufficient notice to the public, including sufficiently associating patent numbers with the corresponding product within the virtual marking Web site;
4. economic impacts of virtual marking, including costs differences between physical marking and virtual marking;
5. advantages and disadvantages of virtual marking in comparison with physical marking;
6. identification of other practical or legal concerns with virtual marking; and
7. any other issues or experiences regarding virtual marking.

Commenters are requested to include information identifying how they are impacted by virtual marking, e.g., whether they are patent owners, licensees, or any other type of user, business, or manufacturer.

Dated: June 11, 2014.

Michelle K. Lee.

Office of the Secretary

Comprehensive Autism Care Demonstration

AGENCY: Department of Defense.

ACTION: Notice of a comprehensive demonstration project for all Applied Behavior Analysis (ABA), including the tiered-model of ABA, for all TRICARE beneficiaries with Autism Spectrum Disorder (ASD).

SUMMARY: This notice is to advise interested parties of a Military Health System (MHS) demonstration project entitled Comprehensive Autism Care Demonstration (“Autism Care Demonstration”). The purpose of the Autism Care Demonstration is to further analyze and evaluate the appropriateness of the ABA tiered-delivery model under TRICARE in light of current and anticipated Behavior Analyst Certification Board (BCBA) Guidelines. Currently, there are no established uniform ABA coverage standards in the United States. Therefore, the demonstration seeks to determine the appropriate provider qualifications for the proper diagnosis of ASD and the provision of ABA, assess the feasibility and advisability of establishing a beneficiary cost share for the treatment of ASD, and develop more efficient and appropriate means of increasing access and delivering ABA services under TRICARE while creating a viable economic model and maintaining administrative simplicity.

Faced with various temporary authorities and the resulting complexity of the current interim TRICARE policies concerning coverage of ABA for ASD, the Department will create a new comprehensive Autism Care Demonstration providing all TRICARE-covered ABA under one new demonstration. This will encompass ABA services that recently have been provided under a patchwork of the TRICARE Basic Program (i.e., the medical benefits authorized under
