SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC received a license renewal application (LRA) from DTE Electric Company, dated April 24, 2014, requesting renewal of operating license number NPF-43, which authorizes DTE Electric Company to operate Fermi 2 at 3486 megawatts thermal. Fermi 2 is located in Frenchtown Township, Monroe County, Michigan. DTE Electric Company submitted the application pursuant to part 54 of Title 10 of the *Code of Federal Regulations* (10 CFR). A notice of receipt of the LRA was published in the **Federal Register** on May 12, 2014 (79 FR 27003). On June 5, 2014, DTE Electric Company submitted an administrative amendment to the license renewal application. A copy of the amendment is available in ADAMS under Accession No. ML14156A237.

The NRC staff has determined that DTE Electric Company has submitted sufficient information in accordance with 10 CFR 2.101, 54.19, 54.21, 54.22, 54.23, 51.45, and 51.53(c), to enable the staff to undertake a review of the application, and that the application is therefore complete and acceptable for

docketing. The current docket number, 50-341, for operating license number NPF-43, will be retained. The determination to accept the LRA for docketing does not constitute a determination that a renewed license should be issued, and does not preclude the NRC staff from requesting additional information as the review proceeds.

Before issuance of the requested renewed license, the NRC will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. In accordance with 10 CFR 54.29, the NRC may issue a renewed license on the basis of its review if it finds that actions have been identified and have been or will be taken with respect to: (1) Managing the effects of aging during the period of extended operation on the functionality of structures and components that have been identified as requiring aging management review; and (2) time-limited aging analyses that have been identified as requiring review, such that there is reasonable assurance that the activities authorized by the renewed license will continue to be conducted in accordance with the current licensing basis (CLB) and that any changes made to the plant's CLB will comply with the Act and the Commission's regulations.

Additionally, in accordance with 10 CFR 51.95(c), the NRC will prepare an environmental impact statement for the renewal of the Fermi 2 operating license (NPF-43) as a supplement to the Commission's NUREG-1437, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," dated June 2013. In considering the LRA, the Commission must find that the applicable requirements of Subpart A of 10 CFR Part 51 have been satisfied, and that matters raised under 10 CFR 2.335 have been addressed. Pursuant to 10 CFR 51.26, and as part of the environmental scoping process, the staff intends to hold public scoping meetings. Detailed information regarding the environmental scoping meetings will be the subject of a separate **Federal Register** notice.

II. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this **Federal Register** notice, any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing or petition for leave to intervene with respect to the renewal of the license. Requests for a hearing or petitions for leave to intervene must be filed in accordance with the
