II. Additional Information

Draft Regulatory Guide, DG–8051, was published in the *Federal Register* on March 13, 2012 (77 FRN 14837), for a 60-day public comment period. The public comment period closed on May 11, 2012. The NRC revised this guide for a better alignment with: (1) 10 CFR Part 20; (2) the internal dose assessment recommended by the International Commission on Radiological Protection (ICRP), Publication 30, “Limits for Intakes of Radionuclides by Workers”; and (3) the recommended bioassay interpretation method by ICRP Publication 54, “Individual Monitoring for Intakes of Radionuclides by Workers: Design and Interpretation.”

III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.
IV. Backfitting and Issue Finality
   Issuance of this final RG does not constitute backfitting as defined in 10 CFR 50.109, 70.76, 72.62, or 76.76 and is not otherwise inconsistent with the issue finality provisions in 10 CFR Part 52. “Licenses, Certifications, and Approvals for Nuclear Power Plants.” This final RG provides guidance to applicants for, and holders of, uranium milling licenses and some uranium conversion facility licenses on methods for meeting certain NRC regulatory requirements for bioassays in 10 CFR Part 20.
   Licensees may voluntarily use RG 8.22, Revision 2 to demonstrate compliance with the underlying NRC’s regulations.

SUPPLEMENTARY INFORMATION: Sections 4041 and 4042 of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), 29 U.S.C 1301–1461, govern the termination of single-employer defined benefit pension plans that are subject to Title IV of ERISA. A plan administrator may initiate a distress termination pursuant to section 4041(c), and PBGC may itself initiate proceedings to terminate a pension plan under section 4042 if PBGC determines that certain conditions are present. Section 506 of the Pension Protection Act of 2006 amended sections 4041 and 4042 of ERISA. These amendments require that, upon a request by an affected party, a plan administrator must disclose information it has submitted to PBGC in connection with a distress termination filing, and that a plan administrator or plan sponsor must disclose information it has submitted to PBGC in connection with a PBGC-initiated termination. The provisions also require PBGC to disclose the administrative record relating to a PBGC-initiated termination upon request by an affected party.
   PBGC estimates that three participants or other affected parties will annually make requests for termination information. PBGC estimates that the total annual burden for the collection of information will be about 45 hours and $900 (15 hours and $300 per request).
   PBGC is soliciting public comments to:
   • Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
   • Evaluate the accuracy of the agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
   • Enhance the quality, utility, and clarity of the information to be collected; and
   • Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Issued in Washington, DC, this 16th day of June, 2014.

Judith Starr,
General Counsel, Pension Benefit Guaranty Corporation.
