SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is issuing a revision to an existing guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The NRC issued Revision 2 of RG 8.22 for public comment with a temporary identification as draft regulatory guide (DG), DG-8051. This guide describes a

method that the NRC staff considers acceptable for complying with the Commission's regulations concerning bioassay at uranium mills. It provides methods that the NRC staff considers acceptable to implement Part 20 of Title 10 of the *Code of Federal Regulations*, (10 CFR), "Standards for Protection Against Radiation."

II. Additional Information

Draft Regulatory Guide, DG-8051, was published in the **Federal Register** on March 13, 2012 (77 FRN 14837), for a 60-day public comment period. The public comment period closed on May 11, 2012. Public comments on DG-8051 and the NRC staff's responses to the public comments are available in ADAMS under Accession No. ML13350A639.

The NRC revised this guide for a better alignment with: (1) 10 CFR Part 20; (2) the internal dose assessment recommended by the International Commission on Radiological Protection (ICRP), Publication 30, "Limits for Intakes of Radionuclides by Workers"; and (3) the recommended bioassay interpretation method by ICRP Publication 54, "Individual Monitoring for Intakes of Radionuclides by Workers: Design and Interpretation."

Regulatory Guide, 8.22, Revision 2 also provides: (1) Recommendations based on the nephrotoxic analyses in NUREG-0874, "Internal Dosimetry Model for Applications to Bioassay at Uranium Mills," (Appendix A of the guide); and (2) the consensus standard of the American National Standards Institute/Health Physics Society (ANSI/HPS) N13.30-2011, "Performance Criteria for Radiobioassay," that is applicable for uranium mills.

III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.
