SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the University of Denver Museum of Anthropology, Denver, CO. Based on information possessed by the University of Denver Museum of Anthropology, the geographical affiliation of the human remains is identified as the Turkey Creek Crevice Burial (SPE4277), Pueblo County, CO. This notice is published as part of the National Park Service’s administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 3 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the University of Denver Museum of Anthropology professional staff in consultation with representatives of Arapaho Tribe of the Wind River Reservation, Wyoming; Cheyenne and Arapaho Tribes of Oklahoma (previously listed as the
Cheyenne-Arapaho Tribes of Oklahoma); Comanche Nation, Oklahoma; Crow Tribe of Montana; Ely Shoshone Tribe of Nevada; Fort Belknap Indian Community of the Fort Belknap Reservation of Montana; Fort Sill Apache Tribe of Oklahoma; Keweenaw Bay Indian Community, Michigan; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana; Paiute-Shoshone Tribe of the Fallon Reservation and Colony, Nevada; Pawnee Nation of Oklahoma; Pueblo of San Felipe, New Mexico; Pueblo of Santa Clara, New Mexico; Santee Sioux Nation, Nebraska; Shoshone-Bannock Tribes of the Fort Hall Reservation; Shoshone-Paiute Tribes of the Duck Valley Reservation, Nevada; Sisseton-Wahpeton Oyate of the Lake Traverse Reservation, South Dakota; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico & Utah; and Yankton Sioux Tribe of South Dakota (hereafter referred to as “The Consulting Tribes”).

History and Description of the Remains
In 1968, human remains representing, at minimum, one individual were removed from the Turkey Creek Crevice Burial (5PE4277) in Pueblo County, CO. On February 1, 1968, Paul Stewart and Lawrence Parsons found the remains weathering out of a cliff crevice. Mr. Stewart and Mr. Parsons were in the Turkey Creek area of Pueblo Reservoir making field investigations for the Bureau of Reclamation’s Fryingpan-Arkansas Project. The Project office notified the archeologist who had made the survey of Pueblo Reservoir, Dr. Arnold Withers of the University of Denver. Several months passed before Dr. Withers visited the site and by then it had been vandalized. The burial was photographed and a memo written about it by employees of the Bureau of Reclamation. The burial contained an adult, flexed, head to the southeast, probably with knees partly under the body. Sex was not determined. Traces of ash and charcoal possibly indicate the individual was partly cremated. The remains were said to have a greenish cast. The memo stated that “part of the skeleton, including half the skull was later recovered and sent to the University of Denver.” No known individuals were identified. No associated funerary objects are present. In 1998, human remains (DU#1987.1.1) were found in collections at the University of Denver Museum of Anthropology during an inventory of the Fryingpan-Arkansas Archeological collection. The remains, approximately 37 fragments of cranium, were found in a box labeled “Turkey Creek.” Approximately half of the fragments show signs of burning. The remains were for an adult and have a very faint green hue. The University of Denver Museum of Anthropology has determined that the remains found in collection (1987.1.1) were removed from the Turkey Creek Crevice Burial (5PE4277).

The Bureau of Reclamation does not believe that the geographical affiliation of the human remains found in the collection at the University of Denver Museum of Anthropology (1987.1.1) can be identified as the Turkey Creek Crevice Burial (5P54277). Consequently, the Bureau of Reclamation and the University of Denver Museum of Anthropology have agreed that the University of Denver Museum of Anthropology shall proceed with NAGPRA compliance activities with respect to these human remains.

Determinations Made By the University of Denver Museum of Anthropology

Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the Alutiiq Museum and Archaeological Repository. DATES: Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the Alutiiq Museum and Archaeological Repository at the address in this notice by July 24, 2014.

ADRESSES: Dr. Alisha Drabek, Executive Director, Alutiiq Museum and Archaeological Repository, 215 Mission Road, Suite 101, Kodiak, AK 99615, telephone (907) 486–7004.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the possession of the Alutiiq Museum and Archaeological Repository, Kodiak, AK. The human remains were removed from the northern half of the Kodiak Archipelago, AK.

This notice is published as part of the National Park Service’s administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the Alutiiq Museum and Archaeological Repository professional staff in consultation with representatives of the Native Village of Afognak, Native Village of Ouzinkie, Native Village of Port Lions, the Sun’aq Tribe of Kodiak (previously listed as the Shoonaq’ Tribe of Kodiak), and the Tangirnaq Native Village (formerly Lesnoi Village (aka Woody Island)).

History and Description of the Remains

At an unknown date in the 1970s, human remains representing, at minimum, one individual were removed from the northern half of the Kodiak Archipelago, AK. The human remains were removed by a researcher who participated in excavations in the 1970s in the Kodiak Archipelago, including Afognak Island and Uganik Bay. Ms. Judith Grossman of Cambridge, MA, sent the human remains to the Alutiiq Museum on September 12, 2011, to keep the identity of the original collector anonymous. The human remains include a human cranium wrapped in a modern sea otter skin and represent an adult of possibly prehistoric age. No known individuals were identified. No associated funerary objects are present.

An examination of the human remains shows humic staining on the bones and worn dentition with no evidence of modern dentistry. Archeological data indicate that modern Alutiiqs evolved from societies of the Kodiak region, and can trace their ancestry back over 7,500 years in the region. The human remains are most closely affiliated with the modern Kodiak Alutiiq people, represented today by the Native Village of Afognak, Native Village of Ouzinkie, Native Village of Port Lions, the Sun’aq Tribe of Kodiak (previously listed as the Shoonaq’ Tribe of Kodiak), and the
