#### SUPPLEMENTARY INFORMATION:

##### Background

Established in 1964, the Job Corps program is a national program administered by the Employment and Training Administration (ETA) in the Department of Labor (DOL or Department). It is the nation's largest federally-funded, primarily residential training program for at-risk youth, ages 16-24. With 125 centers in 48 states, Puerto Rico, and the District of Columbia, Job Corps provides economically-disadvantaged youth with the academic, career technical, and employability skills to enter the workforce, enroll in post-secondary education, or enlist in the military. Job Corps emphasizes the attainment of academic credentials, including a high school diploma (HSD) or a high school equivalency credential, and career technical training credentials, including industry-recognized credentials, state licensures, and pre-apprenticeship credentials.

Large and small businesses, nonprofit organizations, and Native American tribes manage and operate 97 of the Job Corps centers through contractual agreements with the Department of Labor following competitive procurement, while 28 centers are operated through an interagency agreement with the U.S. Department of Agriculture (USDA). Separate from center operation contracts, Job Corps also contracts with firms and companies, usually small businesses, through competitive procurements, to recruit new students for the program and place graduates and former enrollees into meaningful jobs, education programs, the military, or apprenticeship training. In some instances, however, Job Corps contracts with one entity to both operate a center and manage student recruitment and job placements. Job Corps also receives annual Construction, Rehabilitation,
