EPA acknowledges that further refinements to the listed species assessment will be completed in future revisions and requests public comment on specific areas that will reduce the uncertainties associated with the characterization of risk to listed species identified in the current assessment.

- *Sulfentrazone*. Sulfentrazone is an herbicide registered for use to control a variety of broadleaf weeds on several agricultural crops, ornamental turf/plants, residential lawns, and recreational areas such as golf courses. EPA has completed draft human health and ecological risk assessments, including a screening-level listed species assessment, for all sulfentrazone uses. woody weeds, grasses and brush on feed crop sites (pasture and rangeland) and a variety of non-food crop sites. EPA has completed draft human health and ecological risk assessments, including a screening-level listed species assessment, for all tebuthiuron uses.
