

- Indication of whether or not the airport desires to provide its own screening services;
- Recommendation on which private screening company should perform the screening function, and why, and whether or not the airport intends to enter into a business relationship with the recommended company;
- Information on any major activities scheduled to occur at the airport within the next five years that could impact the transition from federal screening to private screening (for example, major construction); and
- Optional information may be provided to support the consideration of their application.

Purpose and Description of Data Collection

The submission of the SPP application represents the initial notification to TSA of an airport's desire to opt-out of the federal screening provided by TSA employees. TSA currently has a screening presence at approximately 450 airports, of which 18 airports are actively participating in SPP.

The annual burden for the information collection related to SPP is estimated to be two-hours thirty minutes (2.5 hours). TSA estimates that 10 airports will respond annually. The agency estimates that each respondent airport will spend approximately one quarter (.25) hour to complete the application for a total burden of two-hours thirty minutes (2.50 hours). TSA does not require the airports to maintain records of the application submission. However, if the airport chooses to do so, the burden associated with this action is anticipated to be minimal.

Use of Information

TSA will acknowledge receipt of the application, review for completeness, and provide an official response within 120 days from the date of acknowledgement. If the application submission is complete, TSA will provide the applicant with an appropriate approval response and include a status update. If the application is incomplete, TSA will provide a detailed response identifying the actions required for a successful application submission.

The application contains no personally identifiable information, sensitive security information, or classified information, so no special handling or protection is required.

Dated: June 26, 2014.
