

gloves, and drain bags will remain of Chinese origin. Therefore, the finished latex Foley catheter trays will be considered a product of China and U.S.A. for purposes of U.S. Government procurement. The other five tray models will follow a similar result, but as indicated only the origin of the particular catheter was provided (India or Canada for the Silvertouch model) and the origin of the accessories was not submitted.

Holding:

On the basis of the information provided, we find that the operations in Mexico do not constitute a substantial transformation of the components in Medline's latex Foley catheter system management trays. Therefore, the country of origin of Medline's Foley catheter system management trays is China and the U.S. where the items were originally manufactured for purposes of U.S. Government procurement. The other five tray models will follow a similar result, and their country of origin will be where the items of those models were originally manufactured (India, Canada, or the U.S. as the case may be), but specific origin details were not provided for our consideration.

Notice of this final determination will be given in the **Federal Register** as required by 19 CFR 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 CFR 177.31, that CBP reexamine the matter anew and issue a new final determination. Any party-at-interest may, within 30 days after publication of the **Federal Register** notice referenced above, seek judicial review of this final determination before the Court of International Trade.

Sincerely,

Sandra L. Bell,

Executive Director, Regulations and Rulings,
Office of International Trade.
