

jeopardizing the safety or security of people, places or vessels.

7. *Unfunded Mandates Reform Act*

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. *Taking of Private Property*

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. *Civil Justice Reform*

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. *Protection of Children*

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. *Indian Tribal Governments*

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. *Energy Effects*

This action is not a “significant energy action” under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. *Technical Standards*

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. *Environment*

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves the establishment of a safety zone and, therefore it is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

Approval and Promulgation of State Implementation Plans; Idaho: Portneuf Valley PM₁₀ Maintenance Plan Amendment to the Motor Vehicle Emissions Budgets

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking direct final action to approve a State Implementation Plan (SIP) revision submitted by the State of Idaho (Idaho or the State) on April 21, 2014, to amend the Portneuf Valley maintenance plan for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM₁₀). The SIP revision updates the on-road

motor vehicle emissions inventory and motor vehicle emissions budgets (MVEBs) using the EPA’s Motor Vehicle Emissions Simulator (MOVES2010b) and the most recent road dust emission factors. This rulemaking action approves the SIP revision and thereby makes the MVEBs available for transportation conformity purposes. The EPA is approving this SIP revision because it is consistent with the Clean Air Act (CAA).

DATES: This rule is effective on September 15, 2014, without further notice, unless the EPA receives adverse comment by August 18, 2014. If the EPA receives adverse comment, we will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean the EPA.

I. Background for This Action

In 2004, Idaho requested that the EPA redesignate the Portneuf Valley area from nonattainment to attainment for PM₁₀ and submitted a maintenance plan (2004 maintenance plan) that demonstrated attainment of the PM₁₀ NAAQS through 2020. The EPA approved Idaho’s submittal on July 13, 2006 (71 FR 39574). The 2004 maintenance plan included an on-road motor vehicle emissions inventory and MVEBs for PM₁₀, volatile organic compounds (VOC) and nitrogen oxides (NO_x).

The MVEBs serve as a ceiling on emissions from an area’s planned transportation system. Under section 176(c) of the CAA, transportation plans and projects must “conform” to (i.e., be consistent with) the SIP before they can be adopted or approved. Conformity to the SIP means that transportation activities will not cause new air quality violations, worsen existing air quality violations, or delay timely attainment of the NAAQS or delay an interim milestone. The MVEB is the mechanism
