SUPPLEMENTARY INFORMATION:

Public hearings: The Generic Accountability Measure (AM) and Dolphin Allocation Amendment would modify the AM triggering criteria for species in the snapper grouper management complex and golden crab to help bring consistency across species managed by the Council. The amendment could also modify commercial and recreational sector allocations for dolphin (mahi mahi). Snapper Grouper Amendment 32 includes actions to end overfishing and rebuild the blueline tilefish stock in the South Atlantic; Snapper Grouper Regulatory Amendment 20 proposes adjustments to the rebuilding strategy, Acceptable Biological Catch, Annual Catch Limit and other management measures for snowy grouper. Coastal Migratory Pelagic Framework Amendment 2 includes measures to revise the quota and trip limit system for the commercial harvest of Atlantic Spanish Mackerel in the Southern Zone (as proposed in Amendment 20B, this zone includes the EEZ off of South Carolina, Georgia, and the east coast of Florida). Both Dolphin Wahoo Amendment 7 and Snapper Grouper Amendment 33 address measures to allow recreational fishermen to bring fillets from The Bahamas.

Scoping: Snapper Grouper Amendment 35 includes options to remove four species (black snapper, dog snapper, mahogany snapper, and schoolmaster) from the Snapper Grouper Management Complex. Snapper Grouper Amendment 36 includes options to develop a process

for identifying spawning sites/aggregations of species in the snapper grouper management complex, including speckled hind and warsaw grouper, based on the characteristics of sites important for spawning. The public is encouraged to provide information on possible spawning areas as part of the scoping process. The Council is considering options to use Special Management Zones to protect known spawning aggregations.
