

define the probability of 'surprise encounters' with humpback whales. The permit amendment authorizes PWF to approach false killer whales for photo-identification and behavioral observation to study their occurrence, distribution, movement, site fidelity, abundance, social organization, home ranges, and life history in place of previously authorized takes for incidental harassment during vessel surveys. The number of annual takes authorized for the stock would not change. The permit expires on June 1, 2017.

An environmental assessment (EA) analyzing the effects of the permitted activities on the human environment was prepared in compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) for each permit. Based on the analyses in the EAs, NMFS determined that issuance of the amended permits would not significantly impact the quality of the human environment and that preparation of an environmental impact statement was not required. That determination is documented in a Finding of No Significant Impact (FONSI) for each action, signed on July 7, 2014 (File No. 14097) and September 17, 2012 (File No. 16479).

As required by the ESA, issuance of each permit amendment was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
