SUPPLEMENTARY INFORMATION: Section 427A of the Higher Education Act of 1965, as amended (HEA) (20 U.S.C. 1077a), provides formulas for determining the interest rates charged to borrowers on loans made under the Federal Family Education Loan (FFEL) Program, including Federal Subsidized and Unsubsidized Stafford Loans, Federal PLUS Loans, and Federal Consolidation Loans.

The FFEL Program includes loans with variable interest rates and loans with fixed interest rates. Most loans made under the FFEL Program before July 1, 2006, have variable interest rates that change each year. In most cases, the variable interest rate formula that applies to a particular loan usually depends on the date of the first disbursement of the loan. The variable rates are determined annually and are effective for each 12-month period beginning July 1 of one year and ending June 30 of the following year.

Under section 427A(k) of the HEA, FFEL Program loans first disbursed on or after July 1, 2006, have a fixed interest rate.

In the case of some Federal Consolidation Loans, the interest rate is determined by the date on which the Federal Consolidation Loan application was received. Federal Consolidation Loans for which the application was received on or after October 1, 1998, have a fixed interest rate. This fixed rate is based on the weighted average of the loans that are consolidated, rounded up to the nearest higher 1/8 of one percent up to a maximum rate of 8.25 percent.

FFEL variable interest rates are based on formulas that use the bond equivalent rate of the 91-day Treasury bills auctioned at the final auction held before June 1 of each year plus a statutorily established add-on. These formulas apply to: All Federal Subsidized and Unsubsidized Stafford Loans first disbursed before October 1, 1992, that have been converted to variable rate loans; all Federal Subsidized and Unsubsidized Stafford Loans first disbursed on or after October 1, 1992, and before July 1, 2006; Federal PLUS Loans first disbursed on or after July 1, 1998, and before July 1, 2006; and Federal Consolidation Loans for which the Federal Consolidation Loan application was received on or after November 13, 1997, and before October 1, 1998. In each case, the calculated rate is capped by a maximum interest rate. The bond equivalent rate of the 91-day Treasury bills auctioned on May 27, 2014, which is used to calculate the interest rates on these loans, is 0.03 percent.

For Federal PLUS loans first disbursed before July 1, 1998, the interest rate is based on the weekly average of the one-year constant maturity Treasury yield, as published by the Board of Governors of the Federal Reserve System on the last day of the calendar week ending on or before June 26 of each year, plus a statutory add-on percentage. The calculated rate is capped by a maximum interest rate. The weekly average of the one-year constant maturity Treasury yield published on June 20, 2014, which is used to calculate the interest rate on these loans, is 0.10 percent.

This notice includes five charts containing specific information on the calculation of interest rates for loans made under the FFEL Program:

Chart 1 contains information on the interest rates for Federal Subsidized and Unsubsidized Stafford Loans that were made as fixed-rate loans, but were subsequently converted to variable-rate loans.
