**Intellectual Property:** By submitting the Submission, each Solver warrants that he or she is the sole author and owner of any copyrightable works that the Submission comprises, that the works are wholly original with the Solver (or is an improved version of an existing work that the Solver has sufficient rights to use and improve), and that the Submission does not infringe any copyright or any other rights of any third party of which Solver is aware.

To receive an award, Solvers will not be required to transfer their exclusive intellectual property rights to the NIH. Instead, Solvers will grant to the federal government a nonexclusive license to practice their solutions and use the materials that describe them. To participate in the Challenge, each Solver must warrant that there are no legal obstacles to providing a nonexclusive license of Solver's rights to the federal government. This license will grant to the United States government a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States throughout the world any invention made by the Solvers that covers the Submission. In addition, the license will grant to the federal government and others acting on its behalf, a paid-up, nonexclusive, irrevocable, worldwide license in any copyrightable works that the Submission comprises, including the right to reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly said copyrightable works.

By participating in this Challenge, each Solver agrees to indemnify the federal government against third party claims for damages arising from or related to Challenge activities.

**Insurance:** Based on the subject matter of the Challenge, the type of work that it will possibly require, as well as an analysis of the likelihood of any claims for death, bodily injury, or property damage, or loss potentially resulting from competition

participation, Solvers are not required to obtain liability insurance or demonstrate financial responsibility in order to participate in this Challenge.

**Privacy, Data Security, Ethics, and Compliance:** Solvers are required to identify and address privacy and security issues in their proposed projects and describe specific solutions for meeting them. In addition to complying with appropriate policies, procedures, and protections for data that ensures all privacy requirements and institutional policies are met, use of data should not allow the identification of the individual from whom the data was collected. Solvers are responsible for compliance with all applicable federal, state, local, and institutional laws, regulations, and policies. These may include, but are not limited to, Health Information Portability and Accountability Act (HIPAA) protections, Department of Health and Human Services (HHS) Protection of Human Subjects regulations, and Food and Drug Administration (FDA) regulations. If approvals (e.g., from an Institutional Review Board) will be required to initiate project activities in Phase 2, it is recommended that Solvers apply for approval at or before the Phase 1 submission deadline. **AGENCY:** Privacy Office, Department of Homeland Security.

**ACTION:** Notice of Privacy Act System of Records.

**SUMMARY:** In accordance with the Privacy Act of 1974, the Department of Homeland Security proposes to update and reissue a current Department of Homeland Security system of records titled, "Department of Homeland Security/U.S. Citizenship and Immigration Services—011 E-Verify Program System of Records." The U.S. Citizenship and Immigration Services E-Verify program allows employers to electronically verify the employment authorization of newly hired employees. To provide individuals the ability to learn about their work authorization status information, the U.S. Citizenship and Immigration Services also operates a free service called Self-Check. The U.S. Citizenship and Immigration Services is launching enhanced features to the Self Check service that permits individuals who successfully complete a Self Check identification process the opportunity to establish a myE-Verify account. The information collected to register and maintain a myE-Verify account is covered by the "Department of Homeland Security/ALL—037 E-Authentication System of Records"
