Permit No. 17364 was issued March 14, 2013 (78 FR 17640) with the Permit Holder's objectives stated as to refine propagation and culture techniques of captive Atlantic sturgeon held in refugia at the USFWS's Northeast Fisheries Center, providing a source of research animals for studies related to tagging, tracking, behavior, physiology, genetics, health, cryopreservation, and other methods for population conservation, recovery, or enhancement of the species in the wild.

The Permit Holder now proposes including five captive holding facilities of Atlantic sturgeon located in the state of Maryland, as well as co-investigators, to conduct similar scientific research on life stages of captive Atlantic sturgeon.

Study objectives would include nutrition, physiology, propagation, contaminants, genetics, fish health, cryopreservation, tagging, and refugia. Additionally, studies would examine abiotic factors (e.g., pH, temperature, salinity dissolved oxygen, etc) influencing distribution and abundance in the wild. The modifications would be valid until expiration of the permit on March 13, 2018.

Dated: August 7, 2014.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
