

Mexico. NOAA plans to issue the initial FFO under the RESTORE Act Science Program during the fall of 2014, subject to the availability of funds and pending the release of the Department of the Treasury Regulations for the Gulf Coast Restoration Trust Fund.

Please note that there are no applications or application forms associated with this notice. This action is merely intended to assist potential applicants prepare for the competitive process to award funding by identifying RESTORE Act Science Program topical areas, setting out short-term program priorities, and outlining the program parameters which will guide funding in response to the anticipated FFO. Specifically, NOAA anticipates that the initial FFO under the RESTORE Act Science Program will address the three short-term priorities identified in the RESTORE Act Science Plan Framework, further refined by three topical areas focusing on: (1) Ecosystem and living marine resources management—improving understanding of the Gulf of Mexico Large Marine Ecosystem; (2) climate change and extreme weather impacts on sustainability of restoration—how to incorporate aspects of climate change and weather impacts into restoration planning; and (3) integration of social/behavioral/economic—science into restoration and management of the Gulf of Mexico Ecosystem.

The parameters of the RESTORE Act Science Program, including the geographic scope of the Program, anticipated duration of the Program, and explanation of the eligibility of potential applicants, are outlined in the Science Plan Framework, which may be accessed online at <http://restoreactscienceprogram.noaa.gov/>.

These priorities and topical areas will be explained in greater detail in the forthcoming FFO, which will also request applications and describe the application process.
