SUPPLEMENTARY INFORMATION:

I. Introduction

The National Transit Database (NTD) is the Federal Transit Administration's (FTA's) primary database for statistics on the transit industry. Congress established the NTD to “help meet the needs of . . . the public for information on which to base public transportation service planning . . .” (49 U.S.C. 5335). Currently, 821 transit providers in urbanized areas report to the NTD through its online reporting system. Each year, performance data from these submissions are used to apportion over \$7 billion of FTA funds for Urbanized Area Formula (Section 5307) grants, Rural Area Formula (Section 5311) grants, Tribal Transit Formula grants, Bus and Bus Facilities Formula (Section 5339) grants, and State of Good Repair (Section 5337) grants. These data are made available on the NTD Web site at www.ntdprogram.gov for the benefit of the public, transit systems, and all levels of government. These data are also used in the annual National Transit Summaries and Trends report, the biennial Conditions and Performance Report to Congress, and in meeting FTA's obligations under the Government Performance and Results Act. Reporting requirements are governed by a Uniform System of Accounts (USOA) and Reporting Manuals that are issued each year. Both the USOA and the Reporting Manual are available for review on the NTD Web site at www.ntdprogram.gov.
