

requirements of an OSHA standard. OSHA uses the information collected under these procedures to: (1) Evaluate the employer's claim that the alternative means of compliance would provide affected employees with the requisite level of health and safety protection; (2) assess the technical feasibility of the alternative means of compliance; (3) determine that the employer properly notified affected employees of the variance application and their right to a hearing; and (4) verify that the application contains the administrative information required by the applicable variance regulation.

Currently, no specific forms are available for preparing variance applications and other documents that may accompany variance applications. OSHA is developing new forms to assist employers in preparing variance applications that comply with the information collection requirements contained in the OSH Act and variance regulations.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting OMB approval of the information collection (paperwork) requirements contained in Sections 6(b)6(A), 6(b)6(B), 6(b)6(C), 6(d), and 16 of the Occupational Safety and Health Act of 1970, and 29 CFR 1905.10, 1905.11, and 1905.12. These statutory and regulatory provisions specify the requirements for submitting applications to OSHA for temporary, experimental, permanent, and national defense variances.

OSHA is also requesting OMB approval to develop and use variance application forms for the four types of variances specified by the OSH Act and variance regulations. The four types of variances are: temporary variances (Section 6(b)6(A) of the Act; 29 U.S.C. 655; 29 CFR 1905.10); experimental

variances (Section 6(b)6(C) of the Act; 29 U.S.C. 655); permanent variances (Section 6(d) of the Act; 29 U.S.C. 655; 29 CFR 1905.11); and national defense variances (Section 16 of the Act; 29 U.S.C. 665; 29 CFR 1905.12). The variance regulations specify the information that employers must provide when requesting one of these variances. The variance application forms would organize and clarify the information collection requirements for each type of variance by specifying the requirements in comprehensible language, and providing explanatory material. Employers applying for a variance could download and complete the applicable form from OSHA's Web site. The forms would expedite the application process for employers, and ensure that the information on the application is complete and accurate.

The Agency is proposing to retain its previous burden hour estimate of 366 hours. The Agency will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to approve these information collection requirements and variance application forms.
