

under conditions of expected consumer use. Since it did not appear likely that FSI's petition for waiver would be granted as submitted and that it is not desirable for public policy reasons to grant FSI immediate relief pending a determination on the petition for waiver, DOE declined to grant FSI's request for an interim waiver and sought comment from stakeholders and the public on the merits of FSI's proposed alternative test method. While FSI submitted comments disagreeing with DOE's decision, those comments did not provide sufficient justification for DOE to change its decision in light of the issues discussed above. However, should FSI or other interested stakeholders raise this issue in the context of a test procedure rulemaking or revised petition for waiver, DOE may consider the adoption of an alternative approach such as an appropriate adjustment factor to reassess the situation presented by FSI. At this time, however, given the absence of sufficient information, DOE cannot grant FSI's petition for waiver as requested.

Thus, by this decision and order, DOE denies FSI's waiver request from the applicable residential refrigerator and refrigerator-freezer test procedures found in 10 CFR part 430, subpart B, appendix A-1 and appendix A for the following basic models:

- Keg Beer Coolers (Models SBC590, SBC590OS, and SBC635M);
- Assisted Living Refrigerator-freezers (Models ALBF44 and ALBF68); and
- Hotel Refrigerators (Models HTL2 and HTL3).

DOE is also denying FSI's waiver request from the applicable residential refrigerator and refrigerator-freezer test procedures found in 10 CFR part 430, subpart B, appendix A for the following basic models:

- Keg Beer Coolers (Models SBC490B and SBC570R);
- Assisted Living Refrigerators (Models FF71TB, FF73, FF74, AL650R, ALB651BR, AL652BR, ALB653BR, CT66RADA, CT67RADA, AL750R, ALB751R, AL752BR, and ALB753LBR); and
- Ultra-Compact, Hotel Refrigerators (Models FF28LH, FF29BKH, FFAR21H, and FFAR2H).

Under today's decision and order, FSI must test its specific models of its Keg Beer Coolers, Assisted Living Refrigerator-freezers and Hotel Refrigerator variants using the DOE test procedure found in 10 CFR part 430, subpart B, appendix A-1 and, when applicable, the test procedure found in 10 CFR part 430, subpart B, appendix A.

Deputy Assistant Secretary for Energy Efficiency, Office of Technology Development, Energy Efficiency and Renewable Energy.
