Roadmap for the Future of the Cybersecurity Framework

NIST published a Roadmap⁶ in February 2014 detailing some issues and challenges that should be addressed in order to improve future versions of the Framework. Information is sought to answer the following questions:

1. Does the Roadmap identify the most important cybersecurity areas to be addressed in the future?

2. Are key cybersecurity issues and opportunities missing that should be considered as priorities, and if so, what are they and why do they merit special attention?

3. Have there been significant developments—in the United States or elsewhere—in any of these areas since the Roadmap was published that NIST should be aware of and take into account as it works to advance the usefulness of the Framework?
